## OUR LIFETIME GUARANTEE

Gemini guarantees all of our products for life. That means that should a product fade, break or contain any defect, we will refinish or replace the defective materials at no cost to you, as long as the plaque is installed in its original location.

All Gemini products are designed to last a lifetime. We test all our materials and finishes, refine our coating technology, and deliver a product that we know will last much longer than the life of any other product you may install. From experience in the field and from our test lab results, we know that our products will last in excess of 10 years without any noticeable degradation in appearance. And we know, from many installations around the world, that many of our products last longer than that.

Please note that our guarantee applies to defective material only, as described in our warranty statement.

### **THIS IMPORTANT NOTICE TO PURCHASER APPLIES TO ALL GEMINI PRODUCTS**

The following warranty is in lieu of all warranties expressed or implied. Specifically, Seller and Manufacturer disclaims any warranty of merchant-ability or of fitness for a particular purpose and manufacturer/seller's only obligation shall be to replace such quantity of the product proved to be defective. Neither seller nor manufacturer shall be liable for any injury, loss or damage, direct or consequential, arising out of the use of or the inability to use the product. Before using, user shall determine the suitability of the product for his or her intended use and user assumes all risk and liability whatsoever in connection therewith. The foregoing may not be altered except by an agreement signed by officers of seller and manufacturer.

## OUR MISSION

We manufacture custom solutions that identify, direct and protect the world.

Gemini has the expertise and capacity to handle any project. We have plants located in Minnesota, Iowa, Nevada, Texas and Virginia in the United States; Ontario, Canada; and Reynosa, Mexico. With a collective footprint of over 800,000 square feet, we have the capability to handle any customer project that comes our way – large or small.

Our Made True approach sets Gemini apart in the industry – beyond expertise, ability and capacity. Made True is how we go about our business in providing you the finest dimensional letters, logos and plaques.

# *Made True.*

## OUR VALUES

Gemini incorporates our Made True values into everything we do, every day.

**Customer Focus** – Our non-wavering commitment to our customers and our consistent dedication to excellence have produced a client base that includes some of the most respected organizations in the world. When you partner with us, you become an extension of our family.

**Teamwork** – Think of us as a part of your team. Leverage our capacity and equipment along with our expertise in sourcing, manufacturing and logistics for Made True quality, low costs and fast turns. Partner with Gemini to free up your resources to focus on front-end activities to grow your business.

**Stewardship** – Gemini has a passion to serve our communities, the sign industry and our environment. Annually, we share a minimum of 2% of our pre-tax earnings to charitable causes in our communities. In addition, we are involved in more than a dozen sign associations, contribute to the American Sign Museum and are a leading sponsor of industry education and topical research in our field. Gemini also has a long-standing commitment to earth-friendly production, as evidenced by our use of recycled, recyclable and regionally manufactured products, setting the standard for best practices in the industry.

**Stability** – Gemini has been in the sign industry for 55 years; starting with the manufacture of vacuum-formed plastic products. Soon after, we began manufacturing plastic letters, which marked the beginning of our involvement in the sign industry. Despite dramatic changes in the way the world does business, our philosophy has remained unchanged: to provide the highest quality letters, logos and plaques, at the lowest possible cost, hassle-free, with the quickest delivery in the industry.

**Curiosity** – With a curiosity for continuous improvement and the desire to do more for you, our stability offers us the ability to be innovative. We routinely work with virtually every material used in the sign-making process. Our investment in research, development and testing – as well customers like you - keep us on the leading edge.

**Honesty** – Gemini is true to our word and our Lifetime Guarantee. Your Gemini purchase will be Made True, constructed from the highest quality materials and will be guaranteed for life.

**Respect** – Gemini understands the importance and value of your time. We strive to make it easy to do business with us by offering online resources such as our Online Estimators, Live Chat and Online Payment Portal – to not having voicemail – so you know that every time you call you will speak with someone who can help you. Gemini values every customer, and does not have any minimum spend requirements to partner with us.

## **A PROMISE TO OUR CUSTOMERS**

Gemini is committed to supplying you with the world's highest quality dimensional letters, logos and plaques at fair prices, with the fastest delivery, all with a Lifetime Guarantee. If for any reason you have a problem with anything we make or do, we will make it right with you.

### **Dear Fellow Sign, Design and Recognition Professionals,**

Gemini continues to innovate and invest in our product and service offerings to better meet the needs of an ever-evolving industry and most importantly, the needs of you – our partner.

You will see results of these investments, and our innovative focus, first and foremost in the catalog you're holding right now. Gemini acquired a respected, established, successful business – Identification Plates, Inc, otherwise known as, ID Plates. ID Plates is known for providing sheet metal, stock and custom blanks to the awards and recognition industry for over 60 years, along with award winning service. With this acquisition, we now have so many plaques and plates options we felt it important to dedicate a separate catalog specific to these products and capabilities!

You'll also notice our Distribution Products brochure, a targeted piece highlighting our Sign Supply product offerings and key Distributors who offer these additional supplies to support your business.

Investing and innovating in people and process is equally as important as investing in products and capabilities. The foundation of these investments and innovations is key feedback from you, our partner. We know that speed of service is imperative to our collective success. We have made significant strides this year in turning quotes around faster as well as shipping final product out the door faster.

At the end of the day, Gemini is a solutions provider, not just a product provider. Use these catalogs as a foundation for design. Gemini is committed to offering innovative products and services to make it an easy decision to turn to us for your customer's needs, knowing they will get superior product and you will profit. Review the "What's New" section on pages 4-5 for more details.

In closing, from our family to yours, thank you! We're honored to have earned your business and hope we've earned your loyalty as well. And remember, because we value our partnership with you, we will never, ever, sell directly to your customers.

Sincerely,

A handwritten signature in black ink that reads "Frederick Oss".

Frederick M. Oss, *President*

# What's New

## Perfect Pattern For Acrylic, GemLeaf & Laminated Products

The Perfect Pattern™ is an accurate, computer generated pattern printed on resilient, weather-resistant material. Precise hole locations are printed directly on the pattern from a vector art file. Identical characters on an order will have the exact same stud locations for interchangeability and the original art file will be saved for any replacement letters needed in the future.

## Laser Cut Acrylic & GemLeaf

We have reduced pricing for drilled & tapped, flush stud mount Acrylic and GemLeaf letters.

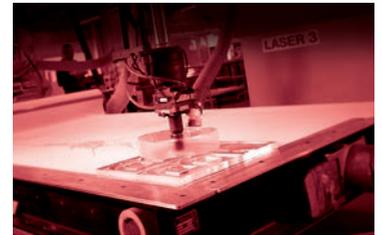

## Improved Rigid Stencil Guide

Gemini's new stencil provides rigidity and precision for a smooth, cost saving installation experience. The special corrugated board folds down for shipping and quickly unfolds for letter installation.

## Improved Production Lead Times

Product shipped in 3 days. Gemini is not only improving speed on the quote and order process, we are also cutting significant time on the production process, allowing us to ship most flat cut products within 3 days of order approval! Our goal is a seamless process for you to fulfill all your customer's needs.

## Additional Metal Laminate Finishes

New finishes added include select Chemetal 600 Series Architectural metals and Interior Arts wood grain finishes. Non-stock finishes are now available at a reduced cost and stocking programs are available for repeat and program orders.

## Single Piece Full Back 20 Mil Double Face Tape

Install your double face tape mounted letters faster than ever. Now available for Flat Cut Acrylic, GemLeaf and some Flat Cut Metal letters and logos. Gemini is offering full coverage, single piece double face tape. (8" or smaller, single piece)

### 3/8" and 1/2" Thicknesses In GemLeaf

GemLeaf is now available in five acrylic thicknesses and 19 finishes.

### Low Profile GemLite

LED lit Low Profile GemLites offer a clean, sophisticated look at budget friendly prices. Depths as shallow as 1" and sizes down to 6" are available. Available in 8 standard translucent colors as well as chrome and brushed finishes.

### Faux Neon GemLite Letters

Neon look created from your art using LED lit, round face formed plastic. Shallow, 1" depths and narrow strokes allow for vast design flexibility. Available in 8 standard translucent colors as well as chrome and brushed finishes.

### New LUXE™ Options

Take your signage upscale. LUXE precision routed lit letters are now available with ten lighting options to tailor to any solution.

### TrueQuote

You may have seen a quote request from Gemini Customer Service that looks like this over the last year. TrueQuote is only one example of how we are utilizing all our resources to improve your customer experience. We know how important quick quote turnaround time is to winning business. Over the last year, Gemini has made giant strides in improving this turnaround time in our core products with our ongoing goal of less than 4 hours for most flat cut acrylic and metal requests.

What's great is this tool is also available to you on our Gemini Partner Portal 24/7. Any quotes the Gemini Customer Service team, or you, complete on this tool are saved on your portal site for reference, changes or submitting to an order.

# Gemini Made True.

As you read in the introduction letter, Gemini continues to innovate and invest into our manufacturing capabilities and product offerings. So, you think our catalog would be thicker with that, right? Well, we decided to go in a different direction this year in an effort to highlight all the new plaques and plates options now available to you to supplement your business. Essentially, we now have so many plaques and plates options we felt it important to dedicate a catalog specific to these products and capabilities!

You'll also notice our Distribution Products brochure, a targeted piece highlighting our Sign Supply offerings and key Distributors who offer these additional supplies to support your business.

As always, think of our catalogs as a foundational element for you to create solutions for your customer, think outside the catalog. Think Gemini.

Below are the cover images for our other catalog pieces. If you are in need of additional catalogs, please complete the postcard included in the catalog and drop it in the mail.

Thank you for your partnership and we wish you a successful 2020!

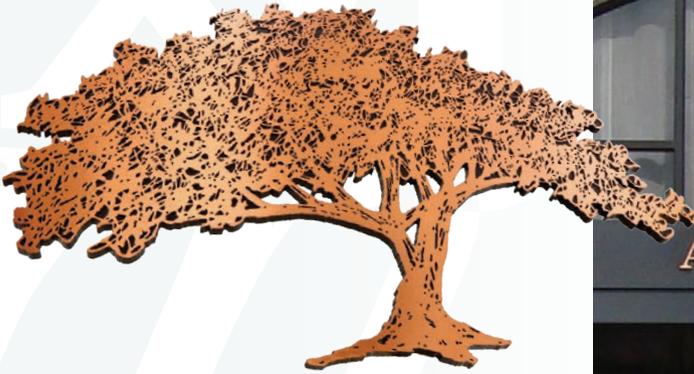

# Metal

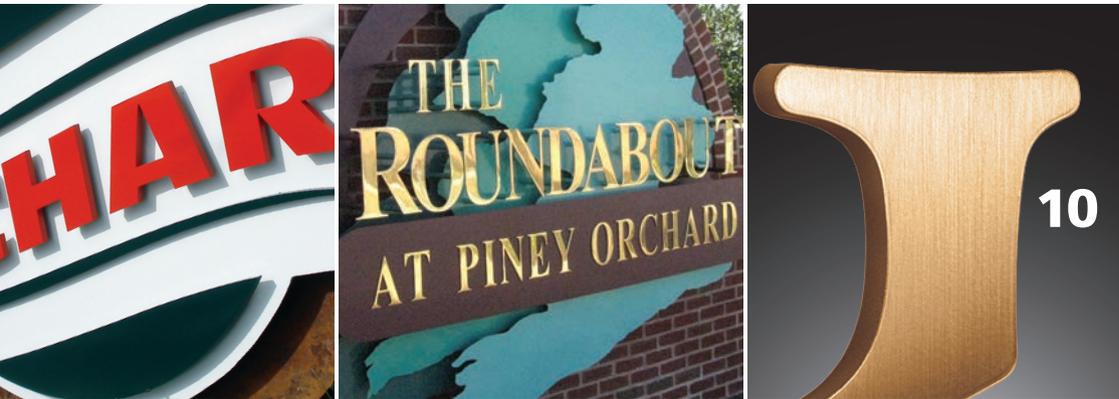

CUT / CAST / FABRICATED

# enduring beauty

Nothing communicates **quality, strength** and **sophistication** like handcrafted metal letters and logos. The classic and enduring look of bronze, aluminum, stainless steel, or other alloys can be created to deliver a timeless signature of extraordinary style.

# Metal

## Cut Metal

Intricate detail in multiple alloys and finish options with typical 4 days production.

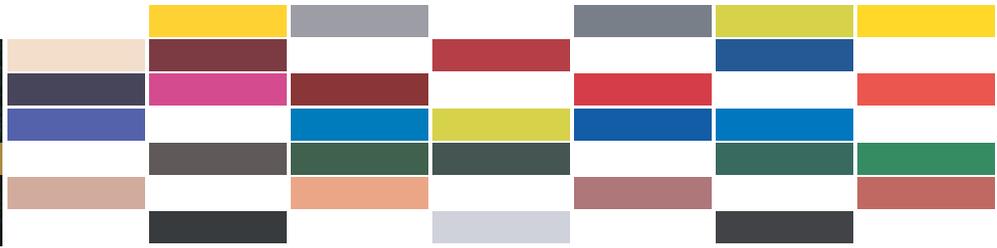

## Cast Metal

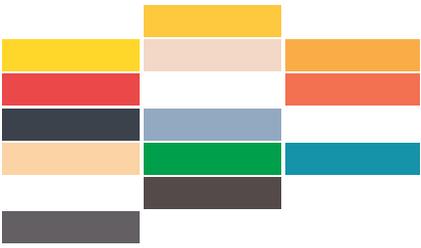

Over 60 different standard letter styles and nearly 70 different finish options with typical 7 days production.

## Fabricated Metal

Sizes ranging from 2" up to 120" x 6" deep in multiple finish options with typical 10 days production.

# Flat Cut Metal

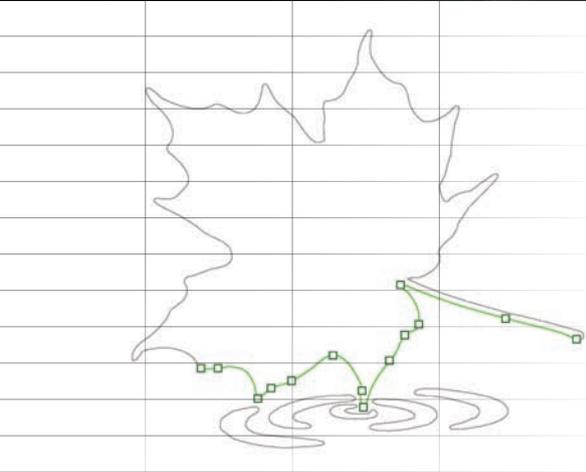

- Aluminum, brass, bronze, copper, stainless steel or Cor-Ten® steel
- Six thicknesses and 50 standard finishes
- Letters and logos from 1/2 inch to 60 inches
- Larger letters & logos available as multi-piece
- Typical 4 days production

## Cost-effective Quality

With decades of experience under our belts, Gemini produces the finest flat cut metal letters available today. Using lasers, CNC and water jets to precisely cut letters and logos from customer-supplied art files, our flat cut metal products provide superior detail to the router-cut alternative. And we make your life easier by taking care of finishing, trim recycling and hardware for you, all in typically 4 production days.

Durable enough for outdoors, yet stylish enough for any boardroom, Gemini flat cut metal is an excellent choice for a variety of signage projects.

## Custom Cut Metal

1.

2.

3.

4.

5.

1. 1/4" thick custom aluminum 6" UC/LC & 12" UC/LC letters, painted black
2. 3/8" thick custom aluminum 15" UC letters, painted white and teal
3. 3/8" thick custom painted aluminum letters & 1/2" thick logo, bottom angle bracket
4. 1/4" thick custom 8" UC, 6" UC/LC & 18" logo, painted matte black
5. 3/8" thick custom multi piece logo, 75" x 110, brushed finish

Custom Cut Metal

1.

2.

3.

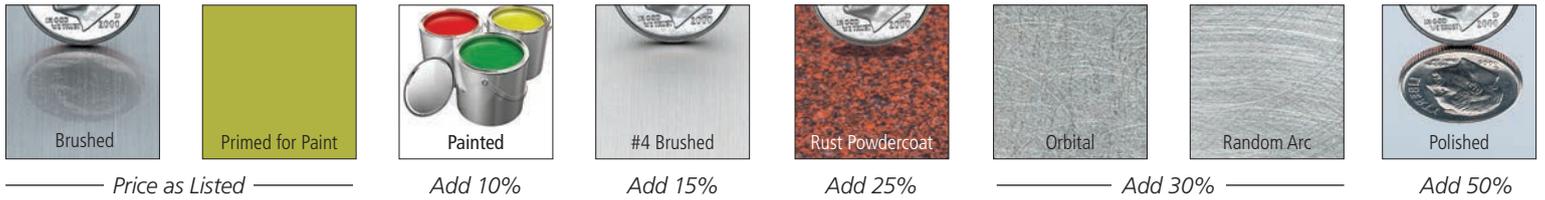

4.

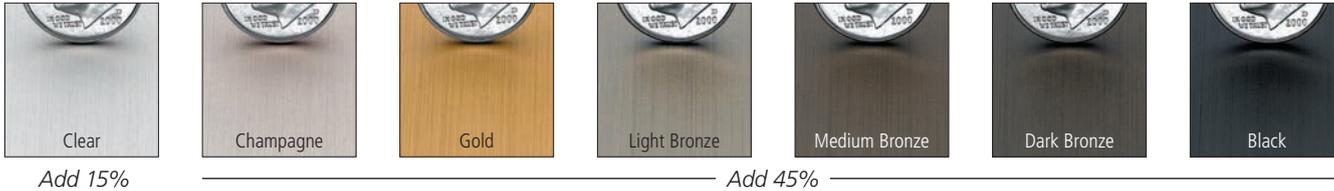

5.

- 1. 1/2" thick custom stainless steel 24" & 20" letters, bottom and top stud mount, brushed finish
- 2. 1/2" thick, custom aluminum 12" & 24" LC letters, painted white
- 3. 1/4" thick, custom stainless steel 12" UC & 4" LC letters, brushed finish
- 4. 1/4" thick, 2-layered custom aluminum, 24" UC/LC and 6" UC, painted white & black
- 5. 3/8" thick custom stainless steel, 15" & 12" UC letters, brushed finish.

## Aluminum Finishes

## Anodized

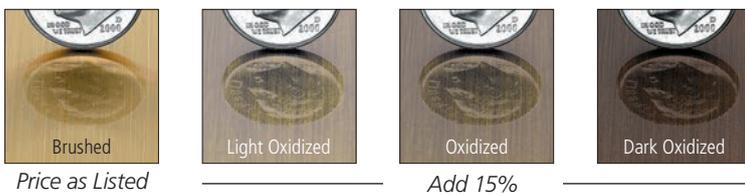

## Polished Anodized

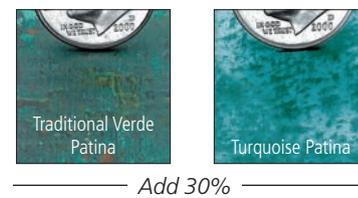

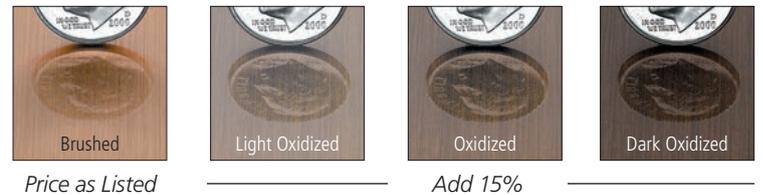

## Anodized Aluminum

Anodized finishes are not just coatings... they are a part of the finished aluminum letter. Anodizing is an electrochemical process that hardens aluminum and allows it to be colored. We perform our own anodizing to ensure your letters within the same order have color consistency and are delivered to you within days. Some of the many reasons to have Gemini anodize your aluminum letters include: Abrasion and weather resistant; Beautiful finish; Increases hardness and durability; Will not crack or peel; Unaffected by sunlight / UV; Environmentally friendly; Cost effective. Note: Colors may vary slightly from order to order.

## Brass Finishes

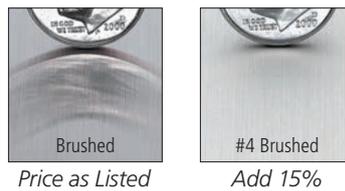

## Bronze Finishes

## Copper Finishes

## Stainless Steel #304 & Cor-Ten® Finishes

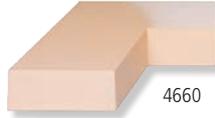

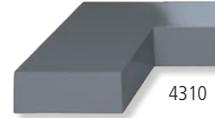

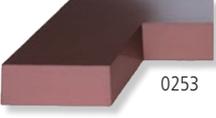

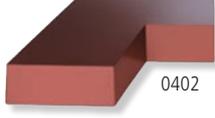

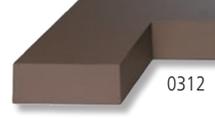

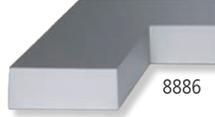

- **Brushed Alloy 316:** Add 30%
- **#4 Brushed Alloy 316 Finish:** Add 45%
- **Polished Alloy 316:** Add 60%
- **Optional Clear Coat:** Add 10%

(Alloy 304 vs 316 see page 30)

NOTES: Brushed finish is a #2-#3 finish (80-100 grit) directionally sanded face, vertical grain standard (optional horizontal), bead blasted returns with a low-gloss clear coating.

Optional #4 Brushed is a smoother finish face than standard brushed (150-180 grit). Polished finish is a #7-#8 finish face, bead blasted returns with a gloss clear coating.

## 46 Standard Painted Colors - (Add 10% to Aluminum Price)

 White 5687	 Ivory 2718	 Desert Sand 4660	 Grey 0209	 Dove Grey 4310	 Safety Green 8090
 Lemon Yellow 2037	 Yellow 2000	 Citrus Yellow 0217	 Sundance Yellow 0218	 Mango 0254	 Orange 2119
 Red-Orange 2662	 Rampart Orange 0256	 Red 2793	 Brick Red 1875	 Black Cherry 2280	 Maroon 2240
 Magenta 2410	 Purple 2287	 Violet Toner 0246	 Midnight Blue 2767	 Dark Blue 2050	 Medium Blue 2860
 Blue 3000	 Light Blue 2648	 Marine Reef Blue 5425	 Teal Blue 3210	 Spring Green 3555	 Emerald Green 0222
 Federal Green 0259	 Light Green 2108	 Dark Green 2030	 Hunter Green 2162	 Brilliant Gold 0400	 Metallic Gold* 2756
 Aztec Gold 0401	 Copper 0253	 Aztec Copper 0402	 Brown 2418	 Medium Bronze* 0312	 Old Copper* 0314
 Duranodic Bronze* 3130	 Dark Oxide 1315	 Metallic Silver* 8886	 Black 2025		

For a more accurate painted color representation you can request our FREE Letter & Logo Color Selector

Painted metal letters are directionally brushed, prepped, liquid sprayed with acrylic polyurethane, then oven baked. Note that the directional metal grain may be visible through the paint, with some colors. Non-metallic standard colors are painted gloss - or are available semi-gloss, satin, or matte upon request. Custom paint matching is available.

\*Indicates metallic colors that are not full gloss.

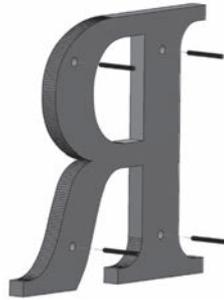

# Mounting Options

Go to [GeminiSignProducts.com](http://GeminiSignProducts.com) to view, print or save .pdf CAD drawings of all mounting and construction options. (Flat Cut Metal > Installation)

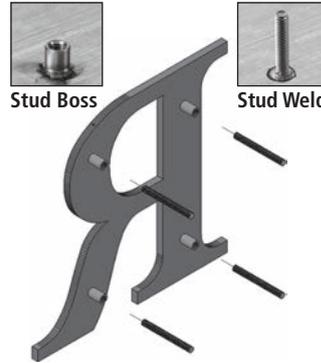

### Plain Mount

Letters and logos are supplied with no mounting holes or hardware. Note: Most metal finishes do require some processing holes on letters backs - even with Plain mounts

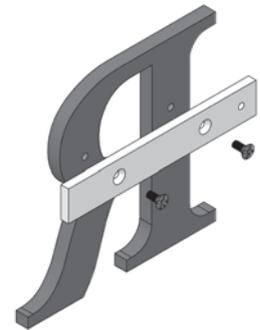

### Stud Mount

Backs of letters and logos, at least 1/4" thick, are drilled and tapped to receive threaded studs, for mounting to wall. Optional alignment for brick, block or rails.

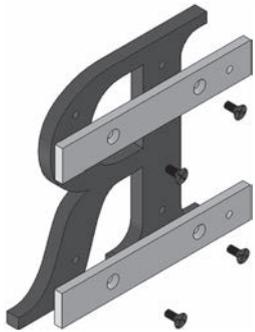

### Welded Stud Mount

Backs of 1/8" thick letters and logos are supplied with welded stud bosses (to receive studs) or 1" long welded studs, for mounting to wall.

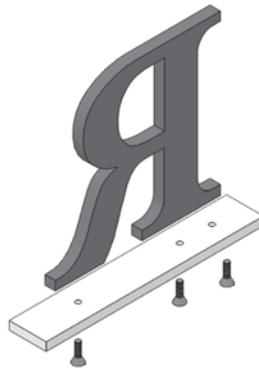

### Single Rail Mount

Add 35% to brushed letter price. Includes one flat 1/4" painted rail. Letters pre-assembled to rail. Typical with 4" - 8" letters. C-channel and anodized finish optional.

### 3A - Double Rail Mount

Add 35% to brushed letter price. Includes two flat 1/4" painted rails. Letters pre-assembled to rails. Typical with 4" - 24" letters. C-channel and anodized finish optional

### 3B - Bottom & Top Rail Mount

Add 35% to brushed letter price. Letters 4"-30", Minimum 3/8" thick Includes painted or anodized aluminum rail. Letters over 8" may require tie-back (not supplied).

### 3B - Bottom & Top Stud Mount

Add 15% to brushed letter price. Letters 4"-30", Minimum 3/8" thick. Letters over 8" may require tie-back (not supplied).

### 3D - Bottom Angle Bracket Mount

Add 35% to brushed letter price. Letters 4"-30", Minimum 3/8" thick. Letters over 12" may require tie-back (not supplied). Angle bracket has a painted finish and optional anodized finish.

### Double Face Tape Mount

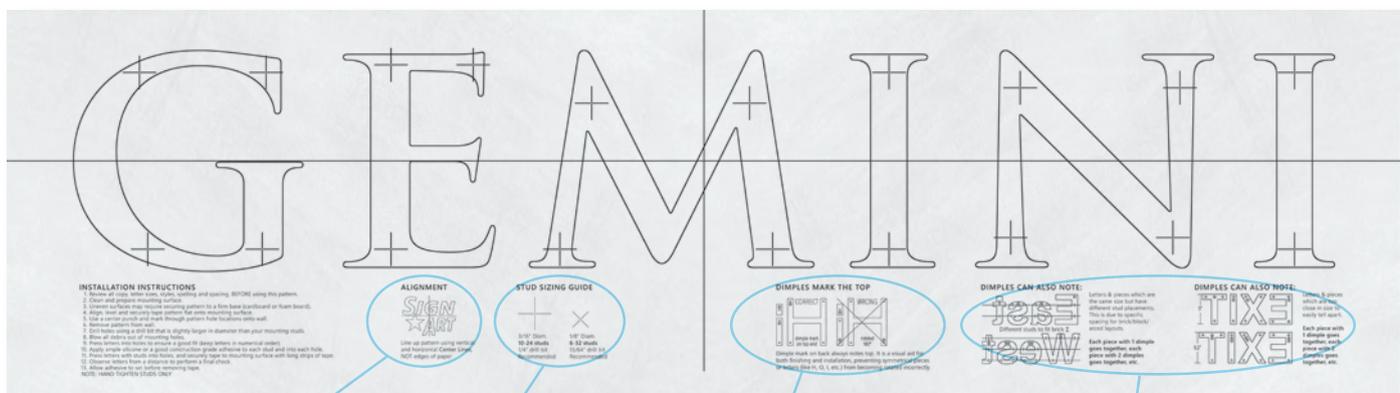

Some letters or logos 8" or smaller can have full coverage, 20 mil. clear double face tape. Some larger letters and logos can have strips of the same tape applied. Email for quote.

## PERFECT PATTERN™ - Flat Cut Metal:

Available on 1/4" thickness and up.

**Digitally precise, durably reliable, expanded application.** Gemini's digital technology now provides a better, more accurate tool for mounting flat-cut metal, flat-cut acrylic and GemLeaf™ (coming soon for metal laminates). The mounting patterns are computer-generated and calibrated to production equipment, printed on Tyvek® to provide resistance to tears and the weather, and assure perfect alignment and exact drill hole locations. These exact hole locations are saved and easily replicated for replacement letters or repeat orders.

Improve your installation experience and ensure the look of each finished sign, with Perfect Pattern from Gemini — your guide to a perfect installation, every time.

### Center Line Alignment

Patterns are aligned with horizontal and vertical lines from the center making installation more reliable.

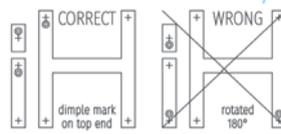

### Stud Sizing Guide

The stud sizing guide provides recommendations for proper drill bits depending on determined stud size.

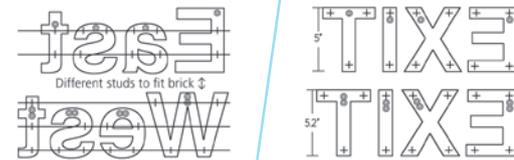

### Top/Bottom Orientation

Dimples are marked on the back to help identify proper orientation.

### Placement/Sizing Indicators

Dimples can also indicate the line a character belongs to, as well as differentiate similar size letters which will have different stud placements.

### Features and Benefits

- Precise drill locations marked, along with recommended drill bit size
- Identical letters are interchangeable
- Printed on weather-resistant Tyvek for no smudging, no tearing
- Printed legend with instructions
- Ability to produce and install replacement letters, with no extra drilling
- Ability to pre-order a pattern allowing pre-work for large scope installations

### Perfect Pattern Pricing Based on Number of Characters

1 - 5	6 - 15	16 - 25	26 - 50	51+
\$16.65	\$33.30	\$83.30	\$133.30	\$249.98

# 1/8" & 1/4" Thick Brushed Aluminum Letters

The tables on these pages show base pricing for 1/8" & 1/4" thick brushed aluminum letters and logos. Use the ALUMINUM FINISHES information below to calculate the price for any other finish.

**Stud mounts required for anodized & polished finishes. Add 15% to stud mount 1/8".**

## PRICE PER LETTER. 1/8" Brushed with NO mounts. 1/4" Brushed with stud mount.

**Letter Size (max. dimension)** Lower Case is 75% of corresponding Upper Case price Small punctuation, such as comma, period and dash are 33% of Upper Case price.

## ALUMINUM FINISHES

<b>— Price as Listed —</b>	<b>Add 10%</b>	<b>— Add 15% —</b>	<b>— Add 45%- Brushed Anodized —</b>							
 Brushed	 Primed for Paint	 Painted	 Clear Anodized	 #4 Brushed	 Champagne	 Gold	 Light Bronze	 Medium Bronze	 Dark Bronze	 Black
<b>Add 25%</b>	<b>— Add 30% —</b>		<b>— Add 75%- Polished Anodized —</b>							
 Rust Powdercoat	 Orbital	 Random Arc	 Polished	 Clear	 Champagne	 Gold	 Light Bronze	 Medium Bronze	 Dark Bronze	 Black

NOTE: Polished & Anodized finishes require a minimum .25" stroke (stud mounts required). Restrictions may apply on letters & logos over 24". Gemini can match your shade of any standard anodized color (sample required). The color of anodized letters will vary from order to order due to the anodizing process.

## NOTES

- Custom paint color** add 10% plus \$25/color (specialty paints may be additional)
- Perfect Patterns:**
  - 1-5 characters = \$16.65
  - 6-15 characters = \$33.30
  - 16-25 characters = \$83.30
  - 26-50 characters = \$133.30
  - 51+ characters = \$249.98
- Stencil Guide:**
  - 1-50 characters = \$41.65
- Cut file** available - \$41.65 (no stud locations)

## The Economies of Cast vs. Flat Cut

A standard or even custom cast letter may save you money:

- Over 1/4" thick ALUMINUM, CAST is more affordable
- CAST ALUMINUM & BRONZE Helvetica is nearly as affordable as 1/4" thick Flat Cut
- 6 or more CUSTOM sets? CAST is less than 3/8" Flat Cut Metal

**Custom Cast**  
See page 50

CAST / CUSTOM CAST		BRUSHED ALUMINUM List Price	BRUSHED BRONZE List Price
12" Helvetica	1" deep / Cast	\$60.00	\$145.00
12" Custom	1" deep / Custom Cast / 6+sets	\$80.00	\$199.00
	1" deep / Custom Cast / 1set	\$94.00	\$212.00
FLAT CUT METAL			
12" Custom	1/4" thick / Flat Cut	\$58.00	\$145.00
	3/8" thick / Flat Cut	\$83.00	\$208.00
	1/2" thick / Flat Cut	\$96.00	\$280.00
	3/4" thick / Flat Cut	\$148.00	n/a
	1" thick / Flat Cut	\$192.00	n/a

# 1/8" Thick Brushed & Passivated 304 Stainless Steel & Natural Cor-Ten® Letters

**PRICE PER LETTER. Brushed with no mounts. Stud weld available – ADD 15%.**

The tables on these pages show base pricing for 1/8" thick brushed stainless steel letters and logos.

**Gemini recommends 1/4" thick if stud mounts are required.**

Use the STAINLESS STEEL FINISHES information below to calculate the price for any other finish.

**Letter Size (max. dimension)** Lower Case is 75% of corresponding Upper Case price Small punctuation, such as comma, period and dash are 33% of Upper Case price.

- **Stencil Guide:**
  - 1-50 characters = \$41.65
- **Cut file** available - \$41.65 (no stud locations)

## ALLOY / FINISH NOTES

**ALLOY 304:** The standard "18/8" stainless; it is the most versatile and most widely used stainless steel. For areas within 50 miles of the coast, Gemini recommends Alloy 316

**ALLOY 316:** 316 offers better overall corrosion resistant properties than 304, particularly higher resistance to pitting and crevice corrosion in chloride environments.

**Cor-Ten®** An environment resistant steel, created by alloying copper, chromium and nickel. The material forms its own continuing protective rust layer, when exposed to atmospheric elements. Essentially, the top layer corrodes, which then protects the steel beneath it – hence Cor-Ten cannot be painted or clear coated, as it will push off most surface surfactants over time. It is not recommended for mounting on any surface that could be stained, due to the bleeding of this rust layer.

**POLISHING:** Requires a minimum of .5" stroke at 1/8" thick (stud weld required). Restrictions may apply on letters/logos over 24". Optional clear polyurethane coat is an additional 10% on top of polishing charge.

## 1/8" Thick Brushed & Passivated 304 Stainless Steel & Natural Cor-Ten® Logos

### PRICE PER LETTER. Brushed with no mounts. Stud weld available – ADD 15%

The tables on these pages show base pricing for 1/8" thick brushed stainless steel letters and logos.

Use the STAINLESS STEEL FINISHES information on page 26 to calculate the price for any other finish.

Gemini recommends 1/4" thick if stud mounts are required.

### PRICE PER LOGO. Brushed with no mounts. Stud weld available – ADD 15%.

  - 1-5 characters = \$16.65
  - 6-15 characters = \$33.30
  - 16-25 characters = \$83.30
  - 26-50 characters = \$133.30
  - 51+ characters = \$249.98
- **Stencil Guide:**
  - 1-50 characters = \$41.65
- **Cut file** available - \$41.65 (no stud locations)

**ALLOY 304:** The standard "18/8" stainless; it is the most versatile and most widely used stainless steel. For areas within 50 miles of the coast, Gemini recommends Alloy 316

**ALLOY 316:** 316 offers better overall corrosion resistant properties than 304, particularly higher resistance to pitting and crevice corrosion in chloride environments.

**Cor-Ten®** An environment resistant steel, created by alloying copper, chromium and nickel. The material forms its own continuing protective rust layer, when exposed to atmospheric elements. Essentially, the top layer corrodes, which then protects the steel beneath it – hence Cor-Ten cannot be painted or clear coated, as it will push off most surface surfactants over time. It is not recommended for mounting on any surface that could be stained, due to the bleeding of this rust layer.

**POLISHING:** Requires a minimum of .25" stroke and stud mounts. Restrictions may apply on letters/logos over 24". Optional clear polyurethane coat is an additional 10% on top of polishing charge.

## Stainless Steel Passivation

Contrary to conventional wisdom, most stainless steel alloys are not completely resistant to corrosion. For example, surface corrosion can occur when foreign residue, generated by secondary finishing processes, becomes entrapped within the grain of the metal. When this residue is exposed to moisture, undesirable surface blemishes and costly repairs can be the result.

So that you and your client can avoid these sorts of headaches from surfacing in the field, we recommend that all exterior installed flat cut stainless steel letters and logos be passivated. Our in-house procedure removes any foreign surface contaminants, and at the same time creates a passive oxide layer that will protect the letters against future surface corrosion.

You can rest assured, as part of our Lifetime Guarantee, that all Gemini flat cut stainless steel letters and logos that have been passivated, strictly follow ASTM A 967 and AMS 2700 standards.

# 1/8" Thick Brushed Brass Letters

# Premium Aluminum & Stainless Steel Finishes

## 3" and larger

Gemini understands that you may have certain customers that demand the highest of quality standards when it comes to their image. For this reason, Gemini has developed a line of metal letters that gives you the opportunity to meet their needs and provide them with premium edge and face finishes that are beyond our standard finish options. All letters are laser cut and then hand sanded on their face and return. Depending on the options you select, the returns may also be buffed to a high sheen. The faces are then either hand-stroked or polished—in such a way that the returns and faces are perpendicular, so there is little if any rounding of the polished edges. These premium finishes are available in all of our standard flat cut out materials and thicknesses—in sizes over 3". Lead times are a bit longer for these products due to the amount of hand work necessary to complete your products. If you have a finish request that you do not see here but would require for your customer; email our inside sales representatives and they will be happy to quote your custom job.

# Cast Metal

- Over 60 standard letter styles
- Nearly 70 different finish options
- Multi-set discounts on custom
- Typical 7 days production

## Class & Distinction

Since the mid-1980s, we've been producing the highest quality, hand-finished cast aluminum and bronze letters in our metal foundries, with all-electric, pollution-free furnaces.

And don't forget we can produce your custom font or logo economically in cast bronze or aluminum, with a variety of finish options, including polished, oxidized and anodized, all done in-house, produced and shipped as quick as 7 days from art approval.

## Custom Cast Metal Letters

NOTES: Brushed finish is a #2-#3 finish (80-100 grit) directionally sanded face, vertical grain standard (optional horizontal), bead blasted returns with a low-gloss clear coating.

Optional #4 Brushed is a smoother finish face than standard brushed (150-180 grit). Polished finish is a #7-#8 finish face, bead blasted returns with a gloss clear coating. Anodized finishes have no clear coat.

Color / finish matching available with customer provided sample.

## \*Buffed Cast Aluminum

Gemini takes our premium aluminum alloy #514, and pours this metal into a cured sand mold. The letters are cooled, removed from the sand mold and shot blasted to remove all sand particulates. The letters are then stroked on the face to a 400 grit finish. The side returns are blasted again and painted metallic silver, then the faces are buffed to a high luster eliminating most, but not all, face imperfections and then a gloss clear coat is applied. Finally, a cast aluminum product with a high luster.

## Anodized Aluminum

Anodized finishes are not just coatings... they are a part of the finished aluminum letter. Anodizing is an electrochemical process that hardens aluminum and allows it to be colored. We perform our own anodizing to ensure your letters within the same order have color consistency and are delivered to you within days. Some of the many reasons to have Gemini anodize your aluminum letters include: Abrasion and weather resistant; Beautiful finish; Increases hardness and durability; Will not crack or peel; Unaffected by sunlight / UV; Environmentally friendly; Cost effective. Note: Colors may vary slightly from order to order. Anodized finishes require a cosmetic coat of paint to hide casting imperfections that come out during the anodizing process.

## Patinas

By their very nature, will vary from letter to letter and order to order. These finishes will change in appearance over time depending on contact with moisture and temperature. Patinas can "bleed" onto the installation surface when installed outside.

## Oxidized

Bronze is chemically treated, then hand rubbed, to produce an antique look on the letter face - with black returns, then sprayed with a low gloss clear coating. Letters may vary slightly from order to order.

## 46 Standard Painted Colors - (Add 10% to Aluminum Price)

 5687 White	 2718 Ivory	 4660 Desert Sand	 0209 Grey	 4310 Dove Grey	 8090 Safety Green

For a more accurate painted color representation you can request our FREE Letter & Logo Color Selector

Painted metal letters are directionally brushed and liquid sprayed with acrylic polyurethane, then oven baked. Note that the directional metal grain may be visible through the paint, with some colors. Non-metallic standard colors are painted gloss - or are available semi-gloss, satin, or matte upon request. Custom paint matching is available.

\*Indicates metallic colors that are not full gloss.

**3B - Bottom & Top Rail Mount**  
Add 35% to brushed letter price. Letters 4"-30", Minimum 3/8" thick. Includes painted or anodized aluminum c-channel rails. Letters over 8" may require tie-back (not supplied).

**3C - Bottom or Top Stud**  
Add 15% to brushed letter price. Letters 4"-30", Minimum 3/8" thick. Letters over 12" may require tie-back (not supplied).

**3D - Bottom Back Angle Bracket Mount**  
Add 35% to brushed letter price. Letters 4"-30", Minimum 3/8" thick. Letters over 12" may require tie-back (not supplied). Aluminum angle is 2" x 2" with a painted finish.

**Bottom Stud w/Back**  
Multiply the brushed letter price by 2  
Letters 4"-24", Minimum 3/8" thick. Includes painted or anodized 1/8" thick aluminum back. Letters over 8" may require tie-back (not supplied). Can be full cover or inset for flush edge.

## Stud Specifications

- Cast letters under 15" are shipped with 10/24 threaded studs-standard. (Thin strokes, 4/40 or 6/32 studs).
- Cast letters 15"+ are shipped with 1/4-20 studs-standard.
- Cast Aluminum letters - Aluminum studs standard (Stainless steel available upon request).
- Cast Bronze letters - Stainless steel studs are standard.
- Metal spacers available upon request (just specify stand-off distance).
- Stud for Brick, 2-5/8" on center, no extra fee
- Stud for Block, 8" on center, no extra fee
- Stud for Rail, horizontal alignment, no extra fee
- Custom stud boss placement per art, add \$12 per letter.

## The Economies of Cast vs. Flat Cut

A standard or even custom cast letter may save you money:

- Over 1/4" thick ALUMINUM, CAST is more affordable
- CAST ALUMINUM & BRONZE Helvetica is nearly as affordable as 1/4" thick Flat Cut
- 6 or more CUSTOM sets? CAST is less than 3/8" Flat Cut Metal

CAST / CUSTOM CAST		BRUSHED ALUMINUM List Price	BRUSHED BRONZE List Price
12" Helvetica	1" deep / Cast	\$60.00	\$145.00
12" Custom	1" deep / Custom Cast / 6+sets	\$80.00	\$199.00
	1" deep / Custom Cast / 1set	\$94.00	\$212.00

FLAT CUT METAL			
12" Custom	1/4" thick / Flat Cut	\$58.00	\$145.00
	3/8" thick / Flat Cut	\$83.00	\$208.00
	1/2" thick / Flat Cut	\$96.00	\$280.00
	3/4" thick / Flat Cut	\$148.00	n/a
	1" thick / Flat Cut	\$192.00	n/a

**Custom Cast**  
See page 50 

# Custom Cast Brushed Aluminum: Flat Face Letters

## Standard Depths

- 4" = 5/8" Depth
- 5" – 9" = 3/4" Depth
- 10" – 14" = 1" Depth
- 15" – 17" = 1-1/4" Depth
- 18" and over = 1-1/2" Depth

### Note:

Custom depths can be specified in 1/4" increments from 1/2" to 1-1/4", and in 1/2" increments from 1-1/2" to 3".

## PRICE PER LETTER. Brushed with stud mount.

**Letter Size (max. dimension)** Lower Case is 90% of corresponding Upper Case price Small punctuation, such as comma, period and dash are 33% of Upper Case price.

- Virtually unlimited design potential
- Expertly crafted to exacting requirements
- Sizes ranging from 2" to 120" tall
- Multiple finish and return depths
- Typical 10 days production

## Expertly Crafted

Since we launched our first line of fabricated stainless steel letters in 2004, we've made several investments in precision manufacturing technology to greatly expand the design possibilities in stainless steel, allowing for virtually any letter stroke to width ratio.

And we've also expanded our metal fabrication capabilities to include structurally robust gauges of aluminum. In fact, our new line of aluminum fabricated letters presents a solution for larger letter applications where our fabricated stainless steel letter line leaves off, extending custom letter height possibilities up to an impressive scale of 120" high.

Choose from a wide variety of finish options in stainless steel – brushed or polished stainless steel to titanium coatings or painted.

Aluminum finishes include brushed and painted.

Check out page 200 for various LED lighting configuration options available to pair up with our metal fabrication capabilities.

## Mounting Methods

# Stainless Steel Fabricated without Back

When it comes to providing your customers the highest expectations for authentic appearance, durability and performance with low maintenance, look no farther than Gemini's flagship line of stainless steel fabricated letters. Offering heavy-gauge construction, precision polished, painted or brushed finishing, continuous lead-free joints — there's little doubt that your solution will be considered ready for heavy-duty demands and an extended lifetime of performance. For marine, coastal regions or harsh-duty conditions, titanium coated or 316 stainless steel is available.

# Painted Aluminum Fabricated without Back

Our fabricated aluminum is handcrafted from premium alloy 5052, with a robust .090" (2.3mm) face and .063" (1.5mm) returns that are precision MIG welded. Available painted, brushed or anodized and made to your specifications, this offering truly expands our ability to provide rugged larger letters and logos.

Our acrylic letters and logos can be customized to virtually any custom graphic design, with laser-cut polished edges and typical 4 days production.

**Formed Plastic**  
Choose from one of our 32 standard styles with typical 2 day production or we can dimensionally replicate your custom letter or logo with typical 6 days production.

**Injection Molded**  
Smooth returns, sharp edges and unblemished letter faces gives the look of cast metal in a plastic product with typical 2 days production.

# Laser Cut Plastic

- Sizes from one inch to six feet
- Larger letters & logos available as multi-piece
- Lightweight and easy to install
- Custom painting and hi-res printing
- Typical 3 days production

## Committed To Detail

### Laser Precision

Gemini's laser cut acrylic is customizable for almost any application. Starting with sheets of acrylic extruded in Gemini's state of the art extrusion plant, we laser cut your design with exacting precision and create a finished product that is sharp, beautiful and lower cost than you would expect.

Our acrylic is available in a wide spectrum of standard pigmented colors or it can be painted to your specifications. Thicknesses range from 1/8" to 1-1/2". When your job calls for precision, Gemini laser cut acrylic is the right choice.

## Custom Laser Cut Acrylic

1.

2.

3.

4.

5.

1. 1/4" thick custom 2", 6" & 8" matte black letters with custom painted green multipiece line and bullets

5. 3/8" thick custom 12" LC & 5" UC, painted 2nd surface, custom blue, green and silver.

## Custom UV Printing

Where multi-step painting and masking is impractical, Gemini's custom color print technology lets you faithfully reproduce your most complex designs, intricately detailed graphical elements, sophisticated color gradients or any photographic images directly onto sign materials. Our advanced, ink jet printing technology lets us print with dimensionally-stable, highly saturated color inks to reproduce virtually any image or design, and is a great option to create strong visual impact at a reasonable cost.

Our full-color inkjet printing capabilities let us print directly to flat plastic, as well as many other substrates including aluminum, brass, bronze and stainless steel. With print resolution at 1,200 dpi, images are vivid, gradients are smooth and the color spectrum is virtually limitless. Our inks are all UV-cured and tested for UV resistance.

From one sign to many, Gemini's custom printing capabilities also let you create sign elements with 100% repeatability, and we offer discounts for multiple quantities of single signs. Email for quote.

## Custom Painting

Gemini is fully equipped to paint acrylic letters and logos per your requirements. By allowing us to provide you with high quality, UV stable, polyurethane painted products, you're assured of guaranteed quality – while avoiding the extra labor, costly resources, and environmental challenges that can be associated with spraying paint – and our paint is guaranteed for life. Email for quote.

### **UV Print or Custom Paint**

*Choose UV printing if you have a very detailed logo or there are gradient colors.*

*Choose painting if you have less detail and solid colors or a painted return.*

## 1/8", 3/16", 1/4", 3/8" & 1/2" Thick Pigmented Colors

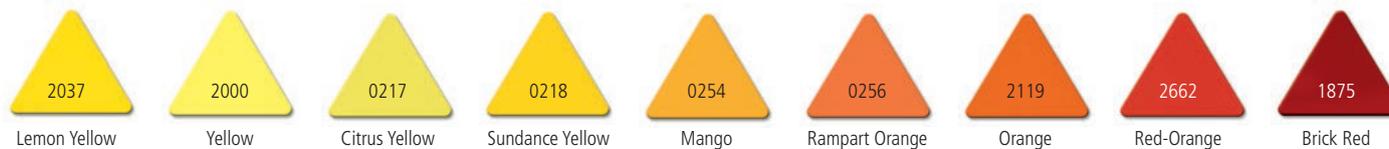

*Metallic Gold and Silver will have a smoked (darker) edge.*

*Painted edge +15%*

\* Indicates metallic colors

## 3/4", 1" & 1-1/2" Thick Colors<sup>†</sup>

*†All colors are painted except Optical Clear, Green Glass & Translucent White.*

\* Indicates colors that do not have a full gloss finish.

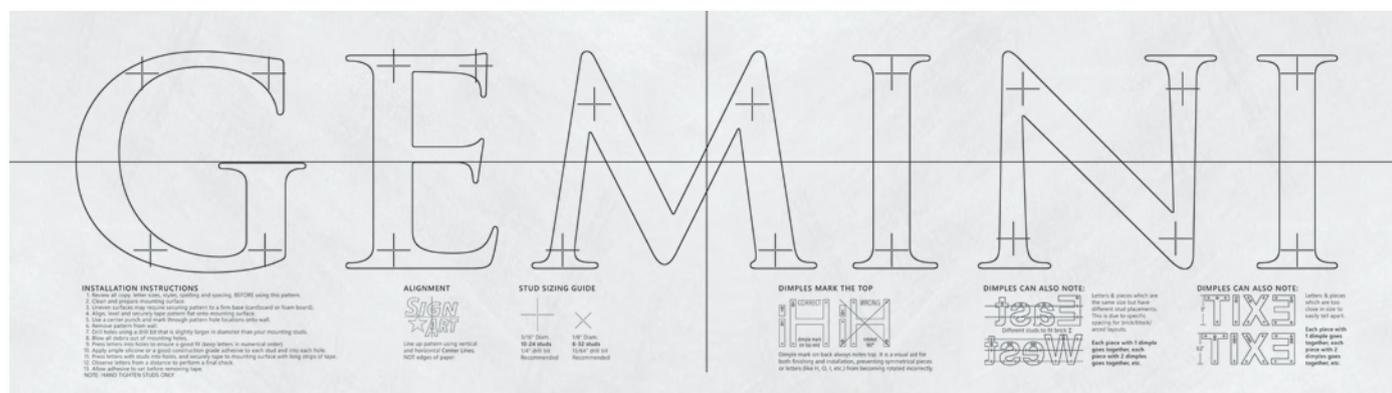

## PERFECT PATTERN™ - Flat Cut Acrylic:

**Digitally precise, durably reliable, expanded application.** Gemini's digital technology now provides a better, more accurate tool for mounting flat-cut acrylic, GemLeaf™ and metal letters (coming soon for metal laminates). The mounting patterns are computer-generated and calibrated to production equipment, printed on Tyvek® to provide resistance to tears and the weather, and assure perfect alignment and exact drill hole locations. These exact hole locations are saved and easily replicated for replacement letters or repeat orders.

Improve your installation experience and ensure the look of each finished sign, with Perfect Pattern from Gemini — your guide to a perfect installation, every time.

- Typical 2 days production on standard styles
- Typical 6 days production on custom formed letters & logos
- Custom painting and sculpted detail
- Low cost, high impact
- NEW - Need address numbers fast? Order today and they ship tomorrow

## Formed Plastic

### Customization, Dimension & Economy

Formed plastic, an original legacy product dating back over 50 years for Gemini, continues to evolve and provide a multitude of opportunities for innovative sign applications. Made from Cellulose Acetate Butyrate (CAB)—a tough UV stable, non-petroleum, completely recyclable plastic, in a wide variety of standard letter styles, or customized to match virtually any letter style or logo that can be designed. Transform your 2-D image into a 3-D logo with unmatched depth and visibility.

## Formed Plastic Portfolio

# Injection Molded Plastic

- Suitable for indoor and outdoor applications
- A tough UV stable, non-petroleum, completely recyclable plastic
- Typical 2 days production
- Six standard styles available in any painted color
- Automotive quality paint
- NEW - Need address numbers fast? Order by phone today and they ship tomorrow

## Precision & Consistency

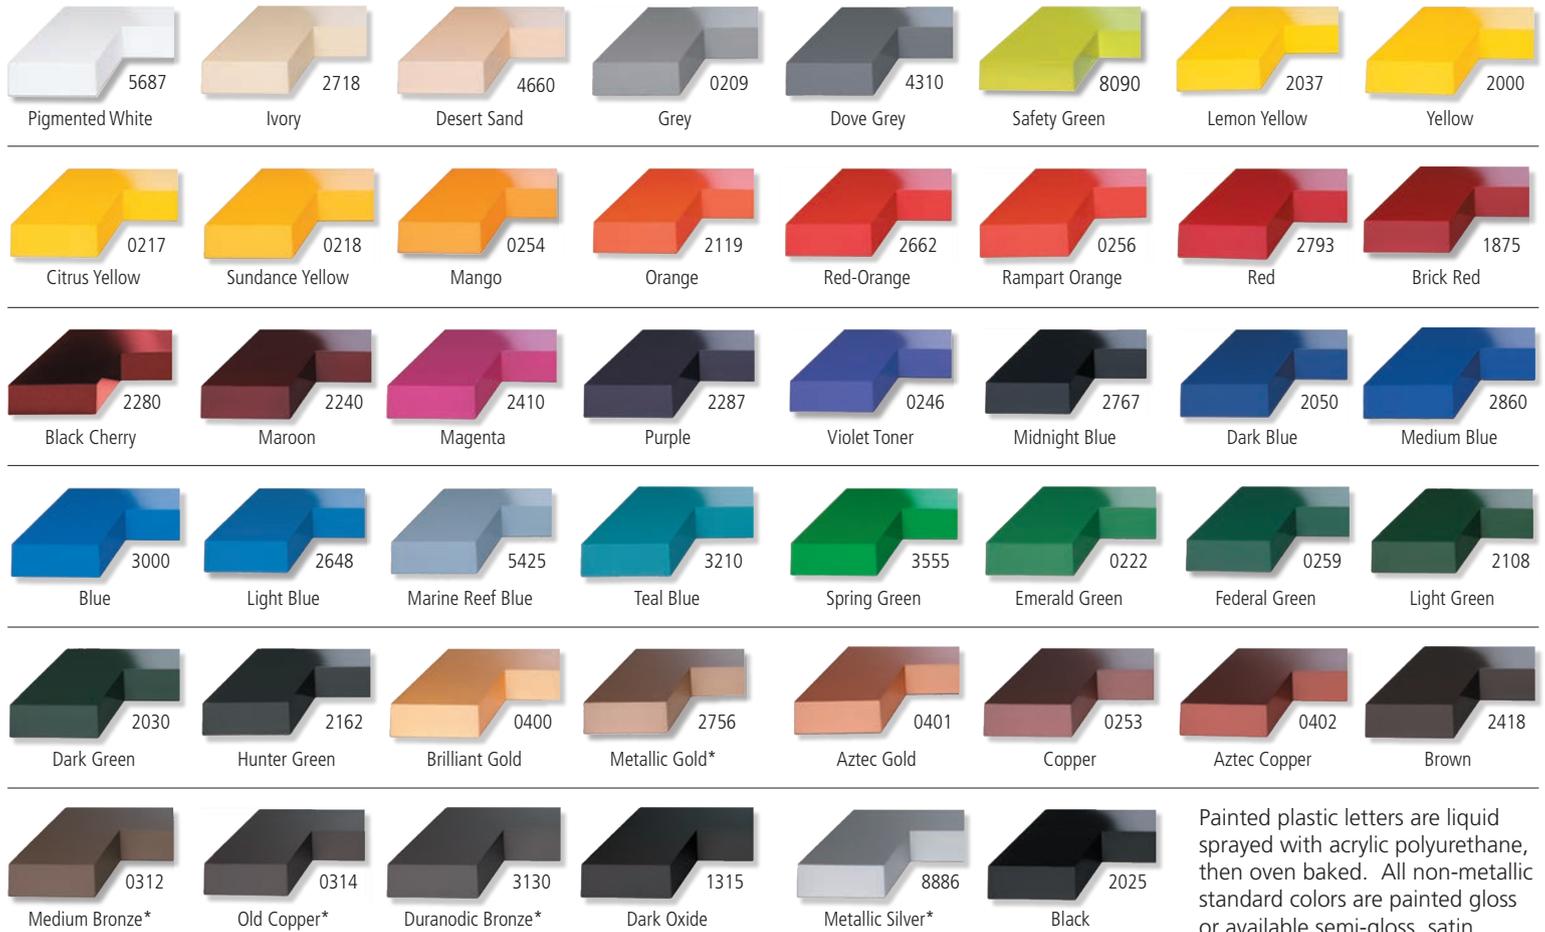

### The Look & Feel of Cast Metal

Smooth returns, razor-sharp edges and unblemished letter faces give our Injection Molded letters the look and feel of cast metal in a plastic product. These letters are extremely durable and will stand up to the scrutiny of indoor applications or the rigors of the outdoors.

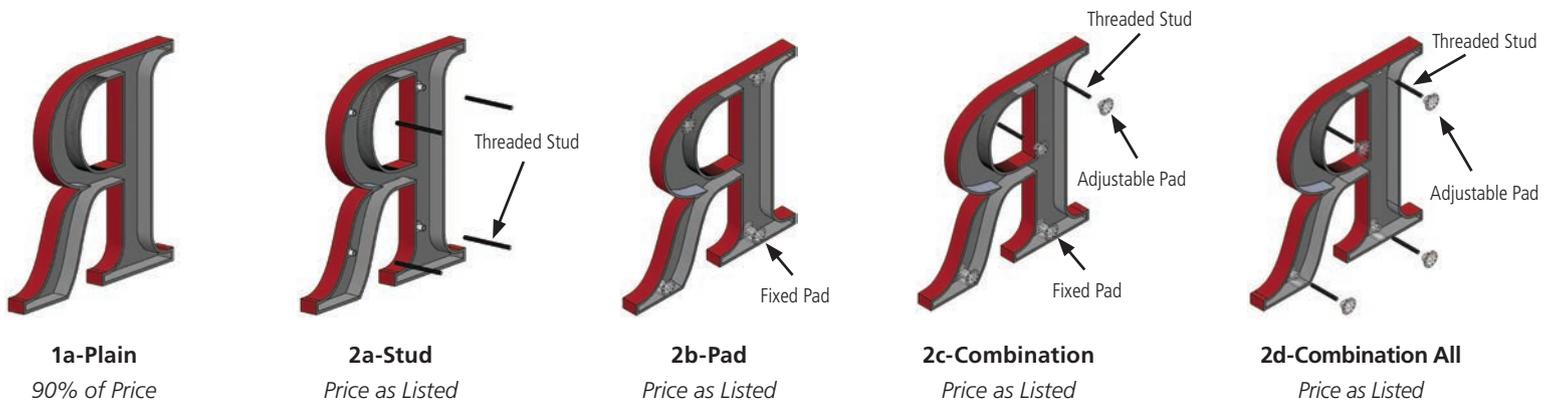

## 46 Standard Colors

All colors are painted except white. \*Indicates metallic colors that are not full gloss.

Painted plastic letters are liquid sprayed with acrylic polyurethane, then oven baked. All non-metallic standard colors are painted gloss or available semi-gloss, satin, or matte upon request. Custom painted matching is available.

## Mounting Options

## NOTES

- **Custom paint color**  
add \$25/color (specialty paints may be additional)

# Laminated

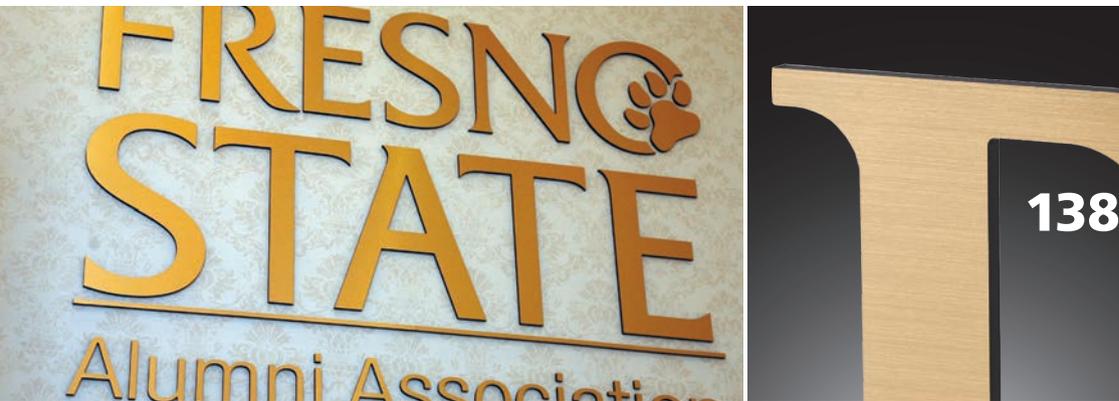

GEMLEAF / ACRYLIC / FOAM

# interior **expression**

From exhibits and retail displays to lobby reception areas, your interior signage and experiential branding projects will **stand out** with **elegant** laminate display letters that artfully infuse metals, plastics and specialty materials.

# Laminated

## GemLeaf™

Using the latest technology, we apply a micron's thick coating of metal to our own modified extruded acrylic.

## Laminate on Acrylic

We use our patented Bern-Lok system to laminate .030 solid metal sheets of aluminum to our own modified extruded acrylic.

## Laminate on Foam

We use our patented Bern-Lok system to laminate .030 solid metal sheets of aluminum or our own 1/8" thick acrylic to one of six different foam depths.

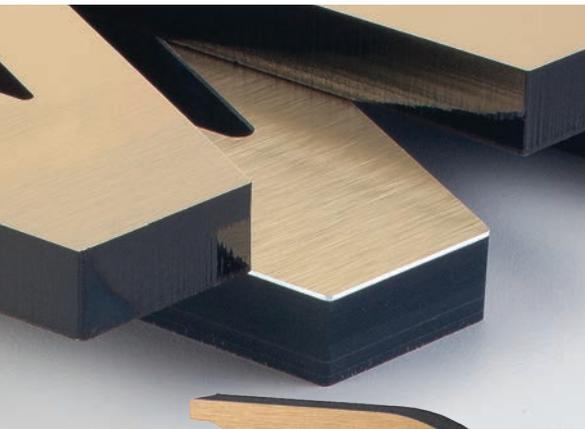

# Laminated

- Metal on acrylic or foam
- Acrylic on foam
- Precision laser / router cutting
- Durable interior grade
- Typical 4 days production

## Unique Looks for Interiors

### Interiors with Impact

Whether you are an interior designer, architect or sign professional, Gemini can help you make an impact with your interior signage project. Gemini's display letters and logos are ideal for in-store displays, reception areas and exhibits. Designed for interior use, our display letters feature a wide range of options, including visually impactful laminates on lightweight plastic and foam substrates.

While these letters are not recommended for exterior use, they are aesthetically pleasing, extremely durable and offer the design flexibility you need to carry out your vision.

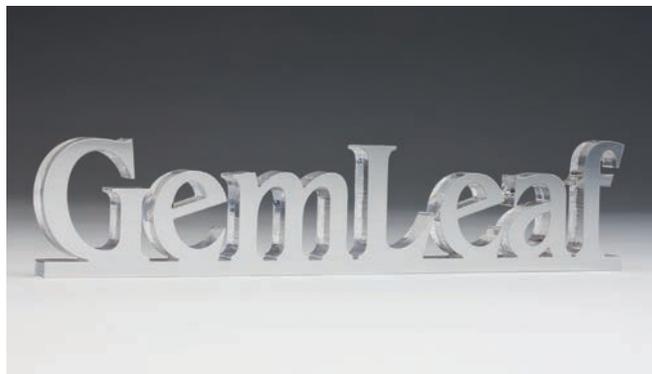

## Custom GemLeaf

Gemini's custom laser cutting capabilities provide you with the ability to cut acrylic into shapes and letterstyles not attainable with routers. You can create designs with detail that you would not think possible. Your 2D drawings and images can be produced into 3D shapes that will make your customers take notice. Multiple sets also afford even lower costs than what you would find in our single piece pricing.

### Advantages in using Gemini GemLeaf letters and logos:

- Superior laser cut edges
- 12 standard pigmented colors
- Typical 6 day production
- 3 standard thicknesses
- Maximum single piece - 22" x 46"

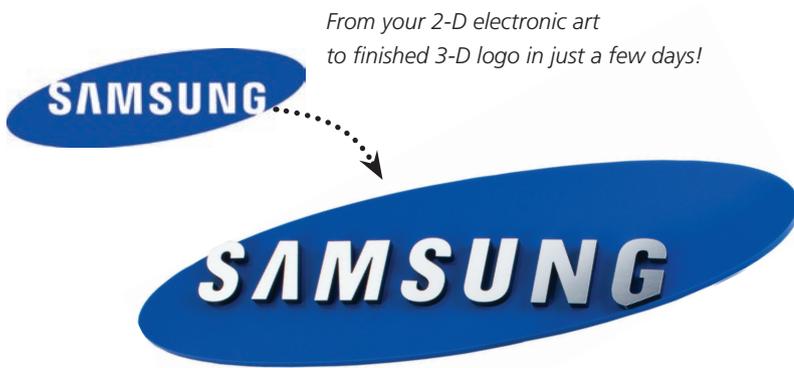

## Quotes in Minutes

Price projects using the following tables or get a TrueQuote with our online quote and order tool, available on GeminiSignProducts.com > Partner Portal

### Submit artwork with the following information:

- Vector based art is required (.cdr, .eps, .ai, .pdf, .fs)
- Size of the finished logo or letters should be in art file
- PMS colors, standard painted or pigmented colors, thickness
- Mounting method
- Number of sets

### What is GemLeaf?

GemLeaf letters use the age-old gilding process – the difference is that Gemini utilizes the latest technology to apply a micron's thick coating of metal to our own modified premium extruded acrylic stock, then laser cut. Although GemLeaf products hold up well under most harsh UV conditions; because of the risk of corrosion we guarantee these letters for interior use only.

### Gemini's Laminated Letter Warranty

Gemini's no-hassle warranty is no different for its display letters than for its exterior grade products, when they are installed in the proper environment. The products in the display letters section of the catalog are designed for interior use--due to limitations of the top-coats, substrates and finishes. While letters in this section of the catalog may be installed in exterior applications—Gemini cannot warrant their life in those environments.

As with all other Gemini products, when used in the proper environment, if for any reason, your product chips, cracks, or fades—Gemini will replace or repair the returned product free of charge, with product as manufactured by Gemini.

## Standard Pigmented Acrylic Substrate Colors

Acrylic colors are not an exact match to formed plastic colors. For accurate color representation you can request a FREE sample.

\*Indicates metallic colors.  
Metallic Gold & Silver will have a painted edge - Add 15%  
For a painted matte, semi-gloss or gloss finish add 30%; if the color is custom add a \$25 paint match fee plus the 30%

Have You Tried Our True Quote Calculator?

[GeminiSignProducts.com](http://GeminiSignProducts.com) > Partner Portal

## Standard GemLeaf Face Colors

GemLeaf letters & logos are made by applying a micron's thick coating of metal to our own modified premium extruded acrylic, then laser cut.

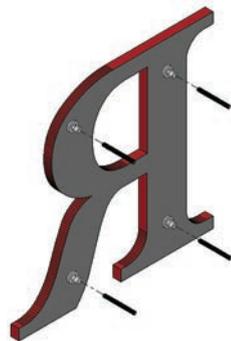

## GemLeaf Mounting Options

### 1a-Plain

Price as Listed

Letters with no mounting hardware, Laminated Letters can be attached to mounting surface with a combination of adhesive or double-faced tape – applied by installer – based on surface and letter weight.

### 2a-Stud

ADD 10%

Stud blocks are solvent bonded to letter backs to receive a stud. These blocks will require the letters to stand-off the mounting surface approximately 3/8" - 1/2". Drilling patterns are required for this installation.

### 2b-Pad

ADD 10%

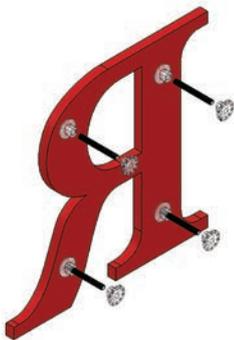

Pads are plastic disks on the rear of the letters. Secure the letters to the wall using a split stencil pattern or spacing tape guide and silicone adhesive. Adjustable pads available upon request. Letters to stand-off the mounting surface approximately 3/8" - 1/2".

### 2c-Combination

ADD 10%

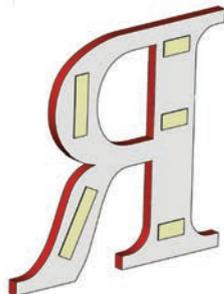

Combination of studs and pads. Stud through a pad on the top portion of each letter, pads only on the bottom portion of each letter. Mounting procedure is the same as a Stud Mount with the addition of securing pads to the mounting surface with adhesive. Studs can be aligned in-line for brick or block mortar upon request. Letters to stand-off the mounting surface approximately 3/8" - 1/2". Drilling patterns are required for this installation.

### 2d-Combination All

ADD 10%

Combination all mounts have stud through a pad on the top and bottom portion of each letter. Mounting procedure is the same as a Stud Mount. Studs can be aligned in-line for brick or block mortar upon request. Letters to stand-off the mounting surface approximately 3/8" - 1/2". Drilling patterns are required for this installation.

### Double Face Tape

ADD 10%

Double face tape mount comes with partial covered backs with a VHB, double faced tape. Full coverage email for quote. Volume of tape is based on letter size and gauge. Heavier letters may require tape and adhesive (such as epoxy on acrylic) to properly secure letters. VHB tape is designed for interior, flat, dry wall installations. Secure the letters to the wall using a stencil pattern.

### Full Coverage Double Face Tape Single Piece

ADD 10%

(letters 8" and under)

### Inset Double Face Tape

Call for quote

Standard Clear 20 mil.

Optional white or grey available.

**PRICE REDUCED**

### Flush Stud

ADD 5%

Thicker letters (min. 3/8" thick) can be drilled and tapped for stud installation. Specify if studs need to be in line for brick / block mortar joints or rails.

# 1/8" or 3/16" Thick - GemLeaf on Acrylic Letters

## PRICE PER LETTER. All pricing is PLAIN MOUNT.

## Custom Metal Laminate on Acrylic

Gemini uses .030 solid Chemetal sheets of aluminum that have been treated to provide your desired finish. These sheets are then laminated onto your choice of one of many acrylic colors. The Bern-Lok lamination process is used to adhere the metal sheets to the substrate. This process is proprietary to Gemini, using a combination of heat, high pressure, and chemical bonding. Once the sheets are laminated, they are router cut using precision CNC equipment to provide the best mechanical cut possible.

### Advantages in using Gemini laminated letters and logos:

- Minimum size - 3"
- Precision CNC cut edges
- 12 standard pigmented colors
- Typical 4 day production
- 8 standard thicknesses
- Maximum single piece - 30" x 60"

## Quotes in Minutes

Price projects using the following tables or get a TrueQuote with our online quote and order tool, available on GeminiSignProducts.com > Partner Portal

### Submit artwork with the following information:

- Vector based art is required (.cdr, .eps, .ai, .pdf, .fs)
- Size of the finished logo or letters should be in art file
- PMS colors, standard painted or pigmented colors, thickness
- Mounting method
- Number of sets

*From your 2-D electronic art  
to finished 3-D logo in just a few days!*

### Gemini's Laminated Letter Warranty

Gemini's no-hassle warranty is no different for its display letters than for its exterior grade products, when they are installed in the proper environment. The products in the display letters section of the catalog are designed for interior use--due to limitations of the top-coats, substrates and finishes. While letters in this section of the catalog may be installed in exterior applications—Gemini cannot warrant their life in those environments.

As with all other Gemini products, when used in the proper environment, if for any reason, your product chips, cracks, or fades—Gemini will replace or repair the returned product free of charge, with product as manufactured by Gemini.

## 1/8", 3/16", 1/4", 3/8" & 1/2" Thick Pigmented Colors

Metallic Gold & Silver will have a painted edge - Add 15%  
 For a painted matte, semi-gloss or gloss finish add 30%;  
 if the color is custom add a \$25 paint match fee plus the 30%

\*Indicates metallic colors.

## Standard Painted Return Colors (+30% on 1/8" - 1/2" Thick)

\* Indicates colors that do not have a full gloss finish.

### Custom Painted Colors

Gemini's in-house paint lab can mix and match nearly any custom color needed. Available in multiple paint sheen options: Gloss, Semi-Gloss, Satin or Matte. Add \$25/color, (1/8" - 1/2" thick acrylic also add 30% to paint). We can match PMS numbers, other paint vendor's numbers, names or MP formulas or a supplied sample.

**Note:** Painted colors may change over time as a result of the environment they are installed in.

## Standard Chemetal™ / Interior Arts Face Finishes

# Metal Laminate on Acrylic Mounting Options

**1a-Plain**

Price as Listed

Letters with no mounting hardware, Laminated Letters can be attached to mounting surface with a combination of adhesive or double-faced tape – applied by installer – based on surface and letter weight.

**2a-Stud**

ADD 10%

Stud blocks are solvent bonded to letter backs to receive a stud. These blocks will require the letters to stand-off the mounting surface approximately 3/8" - 1/2". Drilling patterns are required for this installation.

**2b-Pad**

ADD 10%

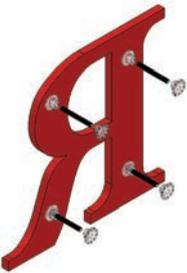

Pads are plastic disks on the rear of the letters. Secure the letters to the wall using a split stencil pattern or spacing tape guide and silicone adhesive. Adjustable pads available upon request. Letters to stand-off the mounting surface approximately 3/8" - 1/2".

**2c-Combination**

ADD 10%

Combination of studs and pads. Stud through a pad on the top portion of each letter, pads only on the bottom portion of each letter. Mounting procedure is the same as a Stud Mount with the addition of securing pads to the mounting surface with adhesive. Studs can be aligned in-line for brick or block mortar upon request. Letters to stand-off the mounting surface approximately 3/8" - 1/2". Drilling patterns are required for this installation.

**2d-Combination All**

ADD 10%

Stud through a pad on the top and bottom portion of each letter. Mounting procedure is the same as a Stud Mount. Studs can be aligned in-line for brick or block mortar upon request. Letters to stand-off the mounting surface approximately 3/8" - 1/2". Drilling patterns are required for this installation.

**Double Face Tape**

ADD 10%

Partial covered backs with a VHB, double faced tape. Volume of tape is based on letter size and gauge. Heavier letters may require tape and adhesive (such as epoxy on acrylic). VHB tape is designed for interior, flat, dry wall installations. Secure the letters to the wall using a stencil pattern.

**Flush Stud**

ADD 5%

Thicker letters (min. 3/8" thick) can be drilled and tapped for stud installation. Specify if studs need to be in line for brick / block mortar joints or rails.

**PRICE REDUCED**

## 1/8" OR 3/16" ACRYLIC SUBSTRATE COLORS

\* Indicates metallic colors. For a painted, matte, semi-gloss or gloss finish add 30%; if the color is custom add a \$25 paint match fee plus the 30%.

**Painted Edge**  
+15%

## CHEMETAL™ /INTERIOR ARTS FACE COLORS (HORIZONTAL GRAIN STANDARD)

See page 149 for additional finishes.

## 1/8" or 3/16" Thick - Metal Laminate on Acrylic Letters

### PRICE PER LETTER. All pricing is PLAIN MOUNT.

The tables on this page show base pricing for 1/8" or 3/16" thick letters and logos. Mounting options shown on bottom of page.

**Letter Size (max. dimension)** Lower Case is 75% of corresponding Upper Case price Small punctuation, such as comma, period and dash are 33% of Upper Case price.

## Custom Laminate on Foam

Gemini uses .030 solid metal sheets of aluminum that have been treated to provide your desired finish or our own extruded 1/8" thick acrylic. These sheets are then laminated onto Gemini's rigid high density foam with a .030" ABS backer. The Bern-Lok lamination process is used to adhere the metal sheets to the substrate. This process is proprietary to Gemini, using a combination of heat, high pressure, and chemical bonding. Once the sheets are laminated, they are router cut using precision CNC equipment to provide the best mechanical cut possible.

### Advantages in using Gemini Laminated letters and logos:

- Maximum single piece - 47" x 47"
- Minimum size - 4"
- Larger letters / logos available as multi-piece
- Typical 6 day production
- 6 standard foam depths

4378 - Bone White Foam

2028 - Charcoal Foam

## Quotes in Minutes

Price projects using the following tables or get a TrueQuote with our online quote and order tool, available on GeminiSignProducts.com > Partner Portal

### Submit artwork with the following information:

- Vector based art is required (.cdr, .eps, .ai, .fs)
- Size of the finished logo or letters should be in art file
- Laminate material, foam color & foam thickness
- Mounting method
- Number of sets

*From your 2-D electronic art  
to finished 3-D logo in just a few days!*

### Gemini's Laminated Letter Warranty

Gemini's no-hassle warranty is no different for its display letters than for its exterior grade products, when they are installed in the proper environment. The products in the display letters section of the catalog are designed for interior use--due to limitations of the top-coats, substrates and finishes. While letters in this section of the catalog may be installed in exterior applications—Gemini cannot warrant their life in those environments.

As with all other Gemini products, when used in the proper environment, if for any reason, your product chips, cracks, or fades—Gemini will replace or repair the returned product free of charge, with product as manufactured by Gemini.

## Standard Pigmented 1/8" Acrylic Face Colors

\*Indicates metallic colors.  
Metallic Gold & Silver will have a painted edge - Add 15%  
For a painted matte, semi-gloss or gloss finish add 30%; if the color is custom add a \$25 paint match fee plus the 30%

**4378 Bone White or  
2028 Charcoal edge are standard.  
Add 30% for painted foam edge.**

## Standard Painted Colors For Foam Edges

\* Indicates colors that do not have a full gloss finish.

### Custom Painted Colors

Gemini's in-house paint lab can mix and match nearly any custom color needed. Available in multiple paint sheen options: Gloss, Semi-Gloss, Satin or Matte. Add \$25/color, (1/8" - 1/2" thick acrylic also add 30% to paint). We can match PMS numbers, other paint vendor's numbers, names or MP formulas or a supplied sample.

**Note:** Painted colors may change over time as a result of the environment they are installed in.

# Laminate on Foam Mounting Options

**1a-Plain**

Price as Listed

Letters with no mounting hardware, Laminated Letters can be attached to mounting surface with a combination of adhesive or double-faced tape – applied by installer – based on surface and letter weight.

**2a-Stud**

ADD 10%

Stud blocks are solvent bonded to letter backs to receive a stud. These blocks will require the letters to stand-off the mounting surface approximately 3/8" - 1/2". Drilling patterns are required for this installation.

**2b-Pad**

ADD 10%

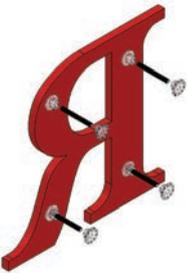

Pads are plastic disks on the rear of the letters. Secure the letters to the wall using a split stencil pattern or spacing tape guide and silicone adhesive. Adjustable pads available upon request. Letters to stand-off the mounting surface approximately 3/8" - 1/2".

**2c-Combination**

ADD 10%

Combination of studs and pads. Stud through a pad on the top portion of each letter, pads only on the bottom portion of each letter. Mounting procedure is the same as a Stud Mount with the addition of securing pads to the mounting surface with adhesive. Studs can be aligned in-line for brick or block mortar upon request. Letters to stand-off the mounting surface approximately 3/8" - 1/2". Drilling patterns are required for this installation.

**2d-Combination All**

ADD 10%

Stud through a pad on the top and bottom portion of each letter. Mounting procedure is the same as a Stud Mount. Studs can be aligned in-line for brick or block mortar upon request. Letters to stand-off the mounting surface approximately 3/8" - 1/2". Drilling patterns are required for this installation.

**Double Face Tape**

ADD 10%

Partial covered backs with a VHB, double faced tape. Volume of tape is based on letter size and gauge. Heavier letters may require tape and adhesive (such as epoxy on acrylic). VHB tape is designed for interior, flat, dry wall installations. Secure the letters to the wall using a stencil pattern.

**Flush Stud**

ADD 5%

Letters can be drilled and tapped for stud installation. Specify if studs need to be in line for brick / block mortar joints or rails.

**PRICE REDUCED**

## ACRYLIC ON FOAM FACE COLORS

\* Indicates metallic colors For a painted, matte, semi-gloss or gloss finish add 30%; if the color is custom add a \$25 paint match fee plus the 30%

**Painted Edge +15%**

## CHEMETAL™ /INTERIOR ARTS FACE COLORS (HORIZONTAL GRAIN STANDARD)

See page 160 for additional finishes.

## 1/2" Thick Foam Letters with Metal or Acrylic Laminate

**PRICE PER LETTER.** All pricing is PLAIN MOUNT.

The tables on this page show base pricing for 1/2" thick letters and logos. Mounting options shown below.

GEMLITE / ELEGANCE / LUXE® / FABRICATED

# everlasting **presence**

With **energy-efficient, maintenance-free** LED illuminated letters and logos, your brand is omnipresent at viewer level or commands **24/7 attention** from roadways with massive scale. The choice of retailers worldwide, face-lit illuminated letters offer vibrant color and brilliant visibility day or night. While stunning, halo-lit letters and logos make a **dramatic statement** in all ambient conditions, indoors or out.

# Illuminated

## Craftsmanship, illuminated

172

### GemLite™

UL Certified GemLite letters are produced with a two-part construction – faces and cans. Both components are formed with UV stable, CAB plastic.

184

### Elegance

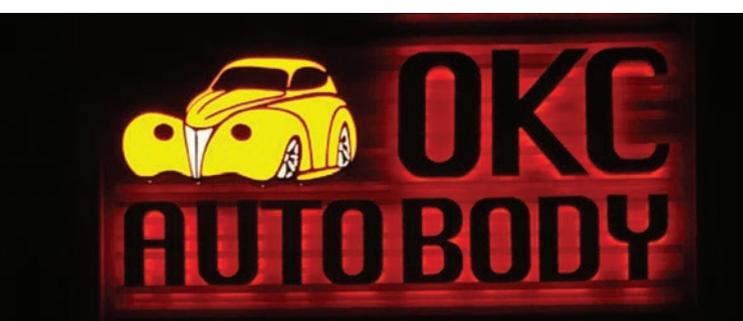

Combining the refined look of fabricated stainless steel or aluminum construction with trimless–face or –back lighting. The exposed acrylic gives a dramatic edge glow to these premium letters and logos.

190

### Luxe™

For custom illuminated logos and letters that require exacting precision, LUXE letters made by Gemini are the solution.

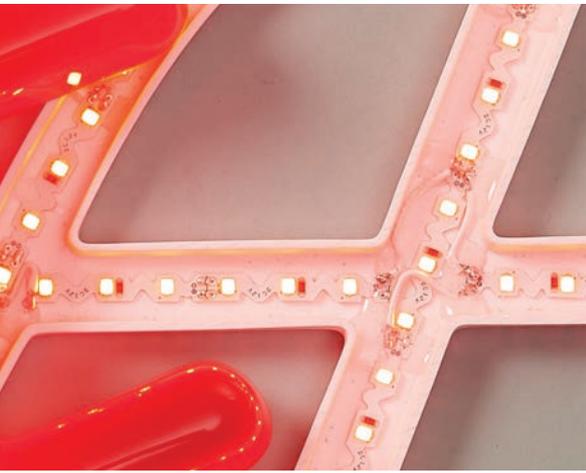

198

### Fabricated

Durable and attractive, our fabricated stainless steel and aluminum letters combine sophisticated style with outstanding visibility. UL Certified LED lighting packages provide turnkey solutions.

# GemLite™ Illuminated

- Multiple Lighting Options
- New Low Profile and Faux Neon
- U.L. Certified
- Typical 8 Day Production Time

## The Possibilities Are Endless With GemLite by Gemini

GemLite dimensional letters and logos offer cost-effective creative possibilities to help maximize your creativity and your image. Made from UV-stable, non-petroleum based, renewable CAB plastic and UL-certified for LED lighting, this line offers affordable, long-lasting quality and a host of standard or customizable options.

## GemLite

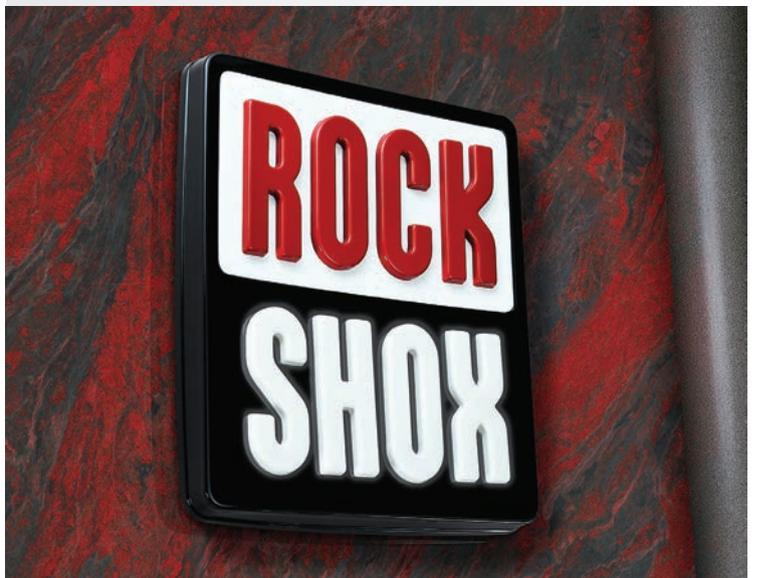

UL Certified GemLite letters are produced with a two-part construction – faces and cans. Both components are formed with UV stable, CAB plastic that has been certified by UL for lit letters. Face lit letters are produced with a translucent material that is custom designed for LED lighting. Typically backs are formed in white to better reflect the LED lights. LEDs are secured to the backs with double faced tape and special hold down blocks.

### Gemini GemLite letter and logos advantages:

- 6 standard letter styles
- Unlimited custom styles
- HI-resolution printed faces
- Up to 2-1/2" deep
- UL Certified
- 8 standard translucent colors
- 5 standard LED colors
- Vinyl accenting available

*Gemlite Letters - Standard or Custom*

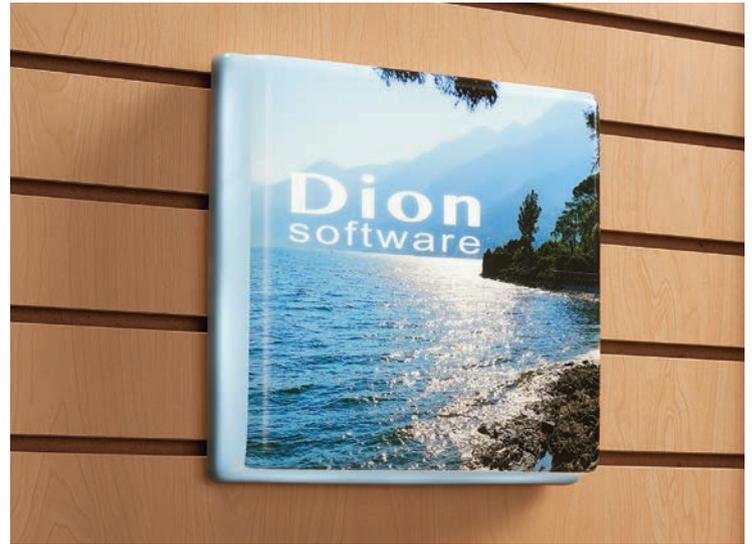

*Gemlite Raised Panels*

## Ordering Custom GemLite Products is easy

### Submit artwork with the following information:

- Vector based art is required (.cdr, .eps, .ai, .fs, .pdf)
- Size of the finished logo or letters should be in art file
- Plastic color, painted color & LED color called out
- Number of sets

U.V. printed panels available. Minimum quantities apply.  
Email [Sales@GeminiSignProducts.com](mailto:Sales@GeminiSignProducts.com) for quote.

### Custom logo Pricing

Email [Sales@GeminiSignProducts.com](mailto:Sales@GeminiSignProducts.com)

From your 2-D electronic art  
to finished 3-D logo in just a few days!

## Mister Donut

### Advantages of custom GemLite letters & logos

- Multi-set discounts make this product cost-effective
- Wide variety of custom options on color, size and shape
- Optional flush face available
- Up to 46" x 68" single piece - Larger logos can be made in multiple pieces

### Face options for GemLite letters

Traditional GemLite faces are produced with a built-in lip, designed to precisely fit over the can or back. This construction option exposes a narrow portion of the back to allow even more edge lighting of the letter. The optional flush face design features a face that cleanly fits over and fully covers the back – with no visible lip edge. Optional flush face design will require more stroke for proper LED illumination. See page 178 for pricing.

## NEW - Low Profile GemLites

Face & Side Lit  
Price as Listed

Halo Lit  
Price as Listed

### Low Profile GemLite Letters

Low profile GemLites allow for smaller letter sizes and greater detail than ever before. The letter face fits completely over the LED populated back for a clean look - no visible can or trim. See page 179 for pricing and page 182 for color options.

### Advantages of Low Profile GemLites

- Approximate 1-1/2" depth
- Sizes as small as 6"
- Greater design flexibility
- 8 standard translucent face colors

Sizes as small as 6"

### Faux Neon

Thin stroke, round face, low profile GemLites can be created from your art for a striking neon look. See page 179 for Low Profile pricing.

## Traditional Round Face GemLite Face & Return Lit Letters

The six most requested GemLite letter styles can be produced without the need of any custom art files - formed molds are in-stock, ready to produce letters for you in just a few days. These common round face styles are now available produced with or without LEDs. Should you need a unique style or size, see page 185 for pricing custom GemLites - for only a few dollars more.

See page 182 for more information and additional supplies that will be required for your installation.

## Custom Flat Face GemLite Face & Return Lit Letters

Beyond our six standard letter styles, GemLite letters can be customized for more creative signage. Nearly any style or logo can be produced in GemLite Formed Channel Letters. Typically a 9" capital letter height is required for block styles, while most serif or script styles require a 12" capital letter height. For smaller sizes or extremely thin strokes, new Low Profile GemLites are available as small as 6" with strokes as narrow as 3/4".

## GemLite Raised Panel - with LEDs

### Circle / Square / Rectangle - with LEDs

Gemini Raised GemLite Panels – with LEDs – now allow for lit pricing of logos or panels with raised lettering. Formed from the same CAB material as GemLite Letters, we can produce circles, squares or rectangles with or without embossed lettering or logo details. Letters as small as 1" high can be raised into panel faces and LED lit in one of eight translucent LED plastic colors. Two part panels – filled with LEDs – can also be produced to allow you to decorate logo details at your shop – by using translucent vinyl.

## GemLite Raised Panel and Logos - with LEDs

Includes LEDs and one opaque painted color. (Subtract 10% for no painting or raised detail)

### LED Package Notes

UL Certified LED packages include LED Lit Letters, Lead wires/cables (standard 36" long), 12VDC power supplies (see note on charge), UL Sign Section labels and associated UL drawings, instructions and certification.

See page 182 for more information and additional supplies that will be required for your installation.

#### POWER SUPPLIES & UL CERTIFICATION

**ADD \$130 per order:** 1-2 sets / individual install locations  
**ADD \$390 per order:** 3-5 sets / individual install locations  
**6+ sets - email for quote**

### Pricing Notes

- Vector art required
- LED color options - Page 182
- Approx. 2" - 2-1/2" deep
- Pricing is for plain mount

## GemLite Colors

### Translucent Face and LED Modules

GemLite letters are designed to be face lit with a special formulated CAB plastic, with built in light diffusion properties. All LED face colors have been tested and approved for exterior use and are UL certified. Proper face and LED color combinations will allow for true, consistent, LED lighting. LED color intensity will vary by color. Light output may be affected by letter size, depth, stroke and profile.

1838	1800	1893	1862	1819	Blue & Green LEDs		
LED White	LED Yellow	LED Red	LED Red-Orange	LED Orange	LED Light Blue	LED Blue	LED Light Green
White LED	White LED	Red LED	Red LED	Warm White LED	Blue LED	Blue LED	Green LED
3170–3600 LUX Light	2390–2700 LUX Light	640–690 LUX Light	690–730 LUX Light	1200–1240 LUX Light	145-160 LUX Light	100 LUX Light	100 LUX Light

- Blue LEDs will produce a softer look than other colors
- The LED light output of Blue & Green will be less than other, brighter colors

## Gemini LED Lighting

### Light your letters with LEDs

Through the use Low Voltage LEDs, Gemini's Gemlite, Fabricated, Cast, LUXE, Radiance™ and hi-res printed panels can be populated with LEDs, to provide a rich lit effect. Order an LED package and you will receive the following:

#### Included in the LED package:

- Sign bodies formed or fabricated for optimal reflectivity
- UL Listed Sign Section labels for all sign bodies and power supplies
- Installation of UL approved LEDs to sign bodies (choose from Red, White, Warm White, Green or Blue)
- Balancing and testing of LED lights to assure even lighting of letters
- Lead wires or cables prepared for easy attachment to power supply lines - standard 36" long
- Lead wire holes drilled into sign bodies (location per your specifications)
- Face attachment holes drilled (when required) - plus painted fastening screws supplied
- UL required weep holes in all letter / logo drops
- Appropriate Class 2 power supplies to power complete set(s)
- Wiring diagrams and instruction guidelines for licensed electrician use
- Manufacturer's 5-year warranty on LEDs and power supplies

#### Not included in the LED package:

- Extra electrical wire and wire connectors to connect letters together (if needed)
- Raceway (if required) and hardware for mounting letters to raceway
- Connections for 110/220/277 volt side of the transformer
- Electrical enclosures (if required for your installation)

#### Component warranty information:

- Manufacturer's 5 year warranty on power supplies
- Manufacturer's 5 year warranty on LED modules (Fabricated, Elegance, Traditional Gemlite)
- Manufacturer's 3 year warranty on LED strips (LUXE & Low Profile GemLite)
- Manufacturer's 9 year warranty on translucent vinyl

## Cast Illuminated Letters

Gemini is now providing UL Certified, halo-lit, cast letters in either aluminum or bronze. This product offers a new presentation of our cast letters, providing dramatic lighting effects to the character, class and depth of cast metal. Round and prismatic faces can provide a very unique profile to these letters compared to traditional flat-faced halo-lit fabricated letters. All standard cast finishes are available – including brushed, painted, anodized or oxidized – and the inside of the letters are painted white to reflect the LED lighting. Clear lexan backs hold the LEDs and close the letter. An option for side-lit halo lighting is available using deeper acrylic backs. Depending on the font or logo, we can produce most letters from 9" to 48"+, and smaller if a minimum 1.5" stroke is maintained. Typically letters are 2" deep. Email your art for a quote.

## Light Boxes:

Another new product offering from Gemini is our fabricated light boxes. Fabricated from aluminum, and painted to your specifications, these are available in sizes from 12"x12" up to 4'x8'. Illuminated boxes are available with full acrylic faces, or can be made with reverse cut-outs and push-thru letters, and are UL Certified. These boxes are also available with unlit flat faces, ready for customer-applied vinyl. Whether needed for multi-tenant industrial warehouses or a single sign in the lobby, these light boxes can be fabricated in traditional rectangles or in custom shapes.

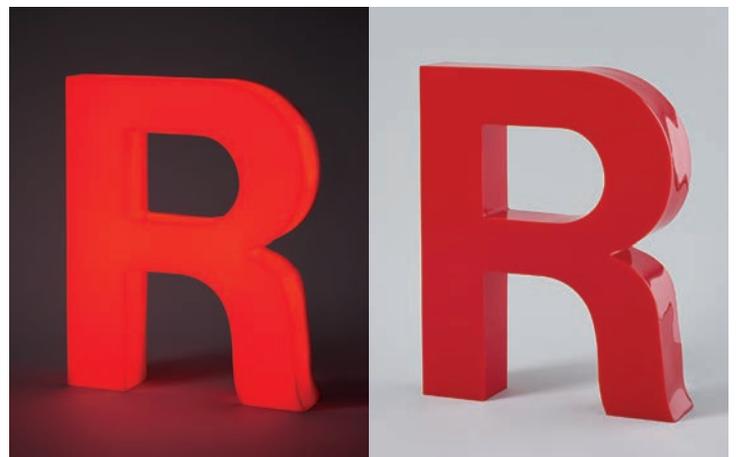

*Push-Thru Illuminated Letters  
Email your art for quote*

## RADIANCE™ Fabricated Acrylic Letters

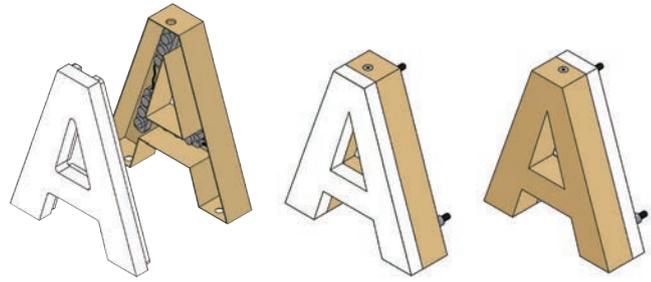

Gemini is known for manufacturing the finest dimensional letters. Fabricated acrylic letters are our latest contribution to serving your growth in an evolving industry. This new LED lit product further expands our GemLite letter look by allowing not only illumination of the face, but also the full returns. Fabricated Acrylic Letters and Logos feature crisp sharp edges, depth of 3", and sizes from 12" - 36" high to help communicate yet a higher degree of lighting sophistication.

Fabricated from light diffused cast acrylic, these letters are designed to evenly diffuse the LED light throughout the face and returns. Faces are constructed with 3/16" (4.5mm) thick translucent acrylic, available in seven colors. Returns are made with 1/8" (3mm) thick acrylic. Components are precision routed to your specifications, fabricated with hand buffed edges, populated with LEDs, and UL approved. Email your art for a quote.

**Color Options** Available in 7 light diffused 3/16" acrylic colors

# Elegance Illuminated

- Stainless steel and aluminum fabricated options
- Halo or face LED lighting
- Nearly limitless customization options on sizes, finishes and colors
- Lifetime warranty on letters and logos
- Made in North America, for competitive production lead times

## Bordering On Brilliance

Elevate your signage to a new level of visibility with Elegance, Gemini's premium line of illuminated, precision-fabricated letters and logos. Elegance combines the timeless, refined look of metal with the stopping power of a visible acrylic edge that extends beyond the metal. The result is a brilliant, glowing effect that gets your signage noticed.

Elegance is made to order with quality craftsmanship to last a lifetime. Choose from a wide range of options to achieve the sophisticated effect you're seeking.

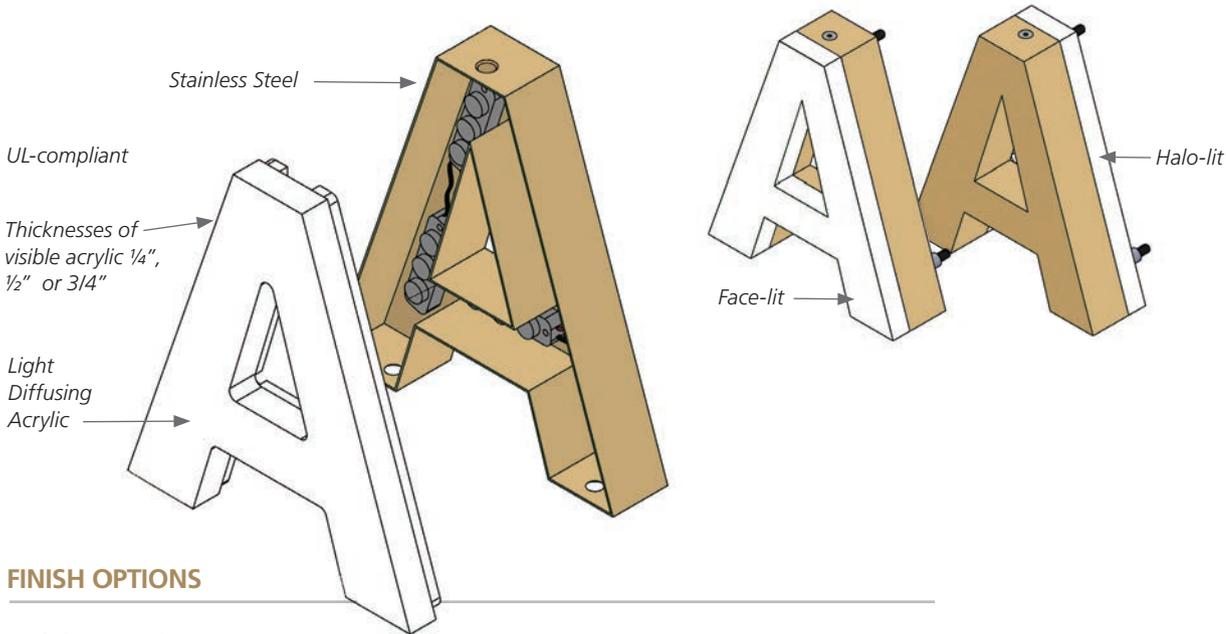

# Elegance Stainless Steel Halo and Face Lit

Get the competitive edge. Increase the stopping power of illuminated signage with the brilliant effect of Elegance. Starting with face- or halo-lit stainless steel letters, Elegance adds a translucent white acrylic that extends beyond the metal's edge. This extra dimension creates a brilliant glowing effect that gets your signage noticed.

FAB

# Fabricated Illuminated

- Unlimited custom styles in stainless steel or aluminum
- Up to 6" deep
- Halo or Face LED lighting
- UL Certified
- 17 standard finish options
- Made in North America for competitive production lead times

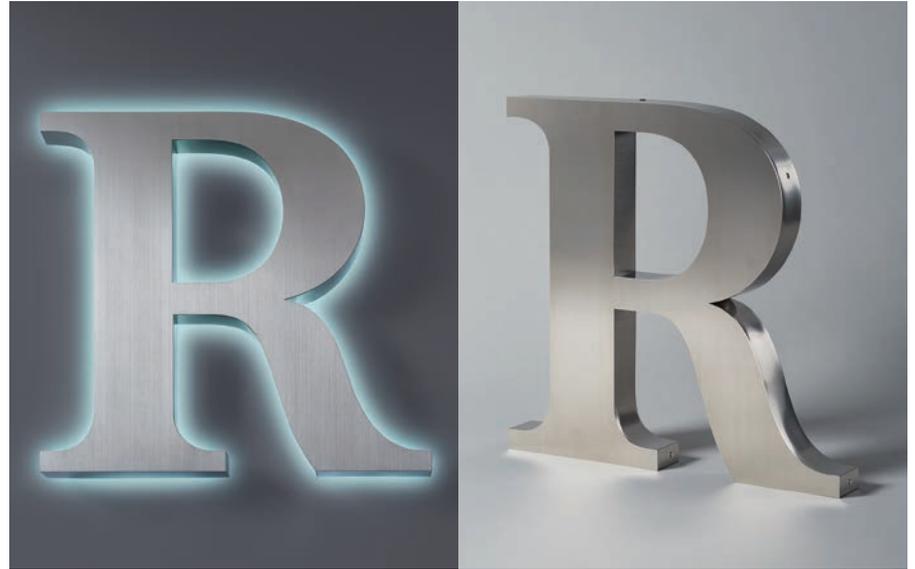

## Fabricated Metal

Combine the premium look of our fabricated metal letters with the sophisticated visibility of diffused halo or face lighting. Produced in a wide range of sizes from 6" to 60" high, in multiple rich stainless steel finishes and aluminum options, all lit with one of five LED colors.

# Stainless Steel Halo Lit

Halo Lit fabricated letters are produced with a removable can to allow for servicing of LEDs. In addition, optional detachable studs create a 1-1/2" stand-off, and allow easy removal of letters from the wall. Halo lit letters can be fabricated with or without LEDs. Alloy 304 is the standard stainless steel alloy, offering excellent resistance to corrosion. Alloy 316 and Titanium are also available and recommended for more harsh environments, such as coastal areas. Minimum 1" stroke required for 1" - 2" deep letters.

# Painted Aluminum Halo Lit

The look of our fabricated precision aluminum letters matches perfectly with the subtle and dramatic halo lighting effect produced by our reverse channel LED-lit letters. The lightweight solution for letters 16" and up to an astounding 120" tall, these dramatic large letters are impossible to ignore, yet won't overwhelm your design or your shop floor. Gemini's aluminum reverse channel letters feature a durable .090" (2.3mm) face gauge with .063" gauge returns, and offer a choice of polycarbonate backs with integrated LEDs to provide the lighting effect you desire. To provide outstanding light consistency and brightness, the interior of the cans are painted white. Halo Lit fabricated, produced with a removable can to allow for servicing of LEDs - or optional detachable studs to create a 1-1/2" stand-off, and allow easy removal of letters from the wall.

#### LED Package Includes:

Fabricated Aluminum letters - insides of cans painted white, Lexan backs for Halo lighting.

UL Listed with Sign Section labels, lead wires/cables and power supplies

Standard leads are three wire, 36" long cables.

Optional longer leads or individual wires available.

Systems are 12VDC, Class 2 power supplies.

Wiring diagrams and instructions are provided with LED lit sets.

UL label location - optional location, per customer request.

#### Not Included:

Electrical field wire, connectors, raceways, enclosures, hardware.

#### Mounting Options:

Standard Halo Lit cans are produced with a removable can mount. Faces / Cans can be removed by loosening screws in the returns. Optional detachable studs can be ordered (no visible return screws),

# Painted Aluminum Face Lit

Large scale and durable performance combine with sophisticated style in our fabricated aluminum channel letters with illuminated acrylic insert. The lightweight solution for letters 16" and up to an astounding 120" tall let you offer the most highly visible, large-scale dimensional letters available. Get the exact combination of colors that function effectively in daylight and low light with a broad selection of acrylic that features a removable face retainer for easy access.

## Aluminum Finish Options

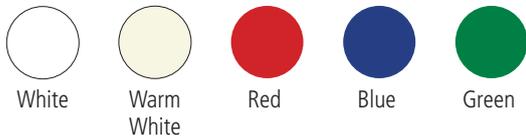

*Painted*  
(custom color \$25/color)

*Brushed*  
(Add 10%)  
Brushed return grain will run from face to back

## LED Color Options

Removable face 3/4" wide outline x 1" deep

7 available acrylic insert colors

0.090" back

0.063" returns

Countersunk face attachment screws

## Pricing Notes

**Serif:** Add 20% (2" min. serif stroke)

**Script:** Add 30%

**Custom Logos:** Email art for quote

- Lower case letters are 90% of price listed
- Punctuation - small pieces; such as comma, period and dash are 33% of upper case price
- Drill patterns see page 211
- Bottom or Top Stud email for quote
- Gemini standard anodized colors are available - Call for quote
- Face / return painted separate +15%

## Acrylic Insert Options

Available in 7 light diffused 3/16" acrylic colors

## POWER SUPPLIES & UL

**\$130 per order:** 1-2 sets per individual install locations  
**\$390 per order:** 3-5 sets per individual install locations

**HALO LIT LETTERS:** Add price per letter – based on size & depth

½" diameter stand-offs: For use on smaller/lighter panels. #8 screw  
 1" diameter stand-offs: For use on small or larger/heavier panels. #10 screw

## Adhesives

We have tested and approved Chem-Calc 1200 or GE RTV108 squeeze tubes of clear silicone, for installing lighter and smaller letters that are mounted with studs and/or pads. Otherwise, always test your adhesive for the installation situation – and use a quality silicone product.

Lighter and smaller parts can be installed with a quality silicone adhesive.

Heavier and larger letters and plaques should be installed with a “stronger” adhesive than Silicone. Always match your adhesive to the mounting surface and product weight. If in doubt, use a stronger industrial adhesive or epoxy – along with appropriate anchors and/or additional structural support.

ITEM	
10 OZ. Silicone caulking tube	\$29.80
2.8 OZ. Silicone squeeze tube	24.60

## Pattern Paper

Pattern rolls are 60# heavy white kraft paper and is marked with 1" squares. Rolls are 48" wide, and available by the foot or in rolls of 500'. (45 pounds/roll. Oversized shipping fee applies)

SIZE	PRICE
per foot	\$1.57
per roll*	447.00

\*Rolls are 500 ft., weigh 45 lbs. and ships oversized

**Detachable Studs** - Includes a package of 6 with compatible allen wrench

ITEM	DETACHABLE STUDS
SMALL - 6-32 (1/8" diameter stud)	\$24.60
MEDIUM - 10-24 (3/16" diameter stud)	\$25.90
LARGE - 1/4-20 (1/4" diameter stud)	\$35.30

## Aluminum Spacers

SPACER	PER INCH PRICE
Aluminum	0.63

\$20.00 Cutting Charge per 100 pieces. 1/4" minimum on aluminum spacers. The following spacer lengths are in stock: 1/8", 1/4", 3/8", 1/2", 5/8", 3/4", 7/8", 1", 1-1/2", 2". No extra cutting fee. Non-stocking custom lengths are available. Priced per inch, plus a \$20 cutting fee per 100 pieces.

Aluminum spacers are stocked in three sizes;

- Large - .275" I.D. (Inside Diameter) for 1/4-20 studs
- Small - .190" I.D. (Inside Diameter) for 10-24 studs
- Slim - .148" I.D. (Inside Diameter) for 6-32 and 4-40 studs; 1" max. length

## Clear Acrylic Strips (Rails)

ITEM	ACRYLIC STRIPS
3/16" x 1-1/2" x 72"	\$30.33

Used for installing plastic letters. Glue (not silicone) letters to strips and install strips on wall. Good for irregular or corrugated surfaces. NOTE: Letters must be ordered "Pad for Rail".

# PERFECT PATTERN™ - Flat Cut Metal, Flat Cut Acrylic & GemLeaf:

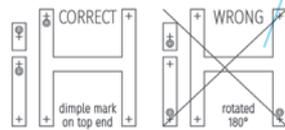

**Digitally precise, durably reliable, expanded application.** Gemini's digital technology now provides a better, more accurate tool for mounting flat-cut metal flat-cut acrylic and GemLeaf™ (coming soon for metal laminates). The mounting patterns are computer-generated and calibrated to production equipment, printed on Tyvek® to provide resistance to tears and the weather, and assure perfect alignment and exact drill hole locations. These exact hole locations are saved and easily replicated for replacement letters or repeat orders.

Improve your installation experience and ensure the look of each finished sign, with Perfect Pattern from Gemini — your guide to a perfect installation, every time.

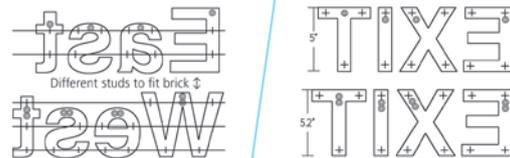

**Center Line Alignment**  
Patterns are aligned with horizontal and vertical lines from the center making installation more reliable.

**Stud Sizing Guide**  
The stud sizing guide provides recommendations for proper drill bits depending on determined stud size.

**Top/Bottom Orientation**  
Dimples are marked on the back to help identify proper orientation.

**Placement/Sizing Indicators**  
Dimples can also indicate the line a character belongs to, as well as differentiate similar size letters which will have different stud placements.

## Features and Benefits

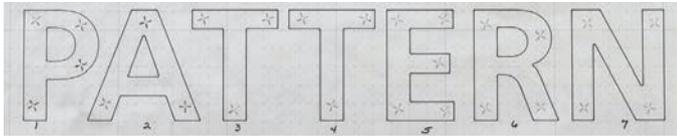

- Precise drill locations marked, along with recommended drill bit size
- Identical letters are interchangeable
- Printed on weather-resistant Tyvek for no smudging, no tearing
- Printed legend with instructions
- Ability to produce and install replacement letters, with no extra drilling
- Ability to pre-order a pattern allowing pre-work for large scope installations

## Perfect Pattern Pricing Based on Number of Characters

1 - 5	6 - 15	16 - 25	26 - 50	51+
\$16.65	\$33.30	\$83.30	\$133.30	\$249.98

## Drawings & Guides

**DRILL PATTERN:** (for all other stud mounted products) Computer-generated tracing of letters with hand punched hole locations of studs, printed on 60# white grid paper. Once taped to wall, hole locations are then drilled and filled with adhesive.

Number of Characters

1 - 5	6 - 15	16 - 25	26 - 50	51+
\$16.65	\$33.30	\$83.30	\$133.30	\$249.98

### NEW RIGID STENCIL GUIDES:

**Stencil** is a computer generated, full size cutout, designed for smaller letters, logos or bars. Typically used to install double face tape letters. Guide is taped to wall, letters are set inside cutout and adhered to wall. Gemini layout team will determine if Stencil or Split Stencil is best for your order.

Number of Characters

1 - 50
\$41.65

**NEW Rigid Split Stencil** is a computer generated, partial cutout of bottom portion of the letters above the baseline, plus 2" below the baseline that provides a perfect way to install plain, pad or double face tape flat cut out letters. This split stencil is generated using the same file that we use to produce your letters. Gemini layout team will determine if Stencil or Split Stencil is best for your order.

Number of Characters

1 - 50
\$41.65

### SPACING GUIDE:

A visual reference guide, typically used for pad mounted letters. The letters in a specific copy are spelled out and properly spaced on a long pattern table or computer generated. A narrow (approximately 2") piece of paper contains small hash marks or plotted lower portions of the letters. Guide is secured to the wall with tape, by the installer, and provides a visual guide for installing letters.

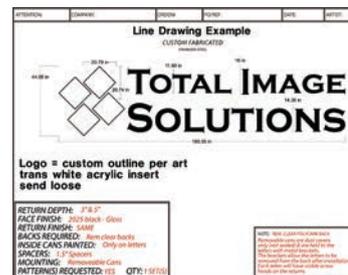

Number of Characters

1 - 100
\$16.65

### LINE DRAWING:

An 8-1/2" x 11" drawing, showing the letter style and copy desired. A description of the style, size and material will be provided on the drawing. The drawing also gives an approximate line length. **\$41.65.**

# Mounting Methods & Drawing / Guide Overview

Caution: Not all styles are standard for Minnesota, Formed Plastic or Cast Metal Letters. Additional per piece pricing may apply.

## What do you mean by lifetime guarantee?

Gemini guarantees all of its exterior products for life. This means that should any Gemini produced product fade, break or contain any defect, we will refinish or replace the defective materials at no cost to you, as long as they are installed on their original location.

Neither seller nor manufacturer shall be liable for any injury, loss or damage, direct or consequential, arising out of the use of or the inability to use the product.

Keep in mind that all exterior letters will require some maintenance to retain their original luster. All plastic and metal letters should be periodically cleaned with a good dish soap and water to remove any dirt or pollutants gathered from the environment. Should the face of a metal letter get scratched, the polyurethane coating can be revitalized using a good car wax.

## What is your return policy?

Most Gemini products are custom made to order for specific customers. But as a service to you, we may offer a credit up to 50% of the original net price, up to \$500. Should you need to return any goods that were ordered in error, canceled by the end user, or not needed. All you do is call for an RMA (Return Material Authorization) number, and return at least one half of the product, to the appropriate plant, as given to you when you call. You do pay the freight for the return.

## Does Gemini's Guarantee cover letters installed in harsh environments?

Yes. As stated in Gemini's warranty statement—Gemini will replace or rework all Gemini exterior rated products that fail in the field, but not cover your costs of removal, reinstallation, or any subsequent work done on the sign mounting surface. Therefore, it is important to keep the sign's environment in mind when selecting the material and finish of letters that will be placed there.

Gemini has a wide range of products that stretch from the most stable in UV and chemical resistance (Formed Letters, Anodized Aluminum, and Painted products) to the most susceptible to failure when placed in harsh environments (Polished Brass, Brushed Aluminum, and Laminated Letters).

Impact resistance is also an issue when examining the regular wear and tear that may be present on a sign. Letters made from acrylic are always more prone to breakage than those made from CAB (Formed Plastic, Minnesota Letters) or metal.

Despite our best aluminum alloys, powder coats, and finishing techniques—aluminum remains extremely reactive and will degrade when placed in an area with moderate UV exposure and harsh chemical or excessive moisture contact. The only way to ensure that aluminum letters do not corrode is to anodize the surface of the letter.

## What art files can I send in for quotations or orders?

Gemini's systems are IBM compatible. The best files to send us are Illustrator (.ai, .eps or .pdf), Corel (.cdr), Gerber (.plt), Flexi (.fs), or Signlab (.eps). We can also convert Mac EPS files.

Please be sure to convert to "curves" or "paths" before sending. Be sure to clearly identify your company name, phone number and reference any quotation number you may have received. Large files (over 10MB) can be uploaded by going to [www.GeminiSignProducts.com](http://www.GeminiSignProducts.com) and login to the Partner Portal.

## How is catalog pricing calculated for multiple add charges?

Some products provide the option of selecting multiple features, that may require additional fees – such as painted acrylic letters that are drilled and tapped for a flush stud mount. When pricing any multiple add fees, always add the fee charges together, then multiply times that base letter price.

Ex: A 12" Acrylic Letter, 3/8" thick, painted with a flush stud mount. Base price is \$28.00. Painted color fee is 30%. Flush stud fee is 15%. Pricing:  $\$28.00 \times 1.45 = \$40.60$  List

**Note:** By using our on-line catalog estimator, this math is done for you.

## How will my order be delivered?

Most orders will ship via UPS ground, at our Guaranteed Ground freight rate (see pg. 218), unless otherwise requested by you.

You pay the freight, so it is your option to ship via air freight if you need your order sooner.

Many overnight, 2-day, and 3-days options are available. Larger letters over 30" may have to ship via truck freight. These orders may ship freight collect with a carrier of your choice.

## Why does Gemini send an art approval drawing?

Everyone may interpret a drawing differently. To minimize the possibility of an incorrect interpretation that can result in delays and added costs, Gemini sends an art approval for your review on custom order requests.

Production on these orders will not begin until you have signed and returned this document agreeing the sizes, finish, mounting, layout (line length) and material is correct as you requested.

Art approval drawings will NOT be sent out for any request with standard Gemini letter styles unless you specifically request one.

## What size letters do I need to order?

Below is a letter visibility chart that has been made for you based upon information provided by Pennsylvania Transportation Institute, Penn State University and the United States Sign Council. Please refer to the complete study for additional information. For further details contact the USSC at 1-215-785-1922.

### Letter Visibility Chart

Viewing Distance	Minimum Letter Height
100 ft.	4"
250 ft.	10"
360 ft. (city block)	16"
500 ft.	22"
750 ft.	33"
1000 ft.	43"
1320 ft. (1/4 mile)	57"

## When does Gemini send an art approval drawing?

Everyone may interpret a drawing differently. To minimize the possibility of an incorrect interpretation that can result in delays and added costs, Gemini sends an art approval for your review when requested or on the following order requests.

### Standard Font Orders:

- Does not fit line length given
- Does not match art provided (Ex. Looks like Helvetica but Helvetica Bold was given)

### Custom Cut Acrylic, Formed & Laminate Orders:

- Orders over \$1,000
- Orders with art modification to meet production restrictions
- Orders with unclear details

### Custom Cut Metal & Cast Metal Orders:

- Orders over \$1,500
- Orders with art modification to meet production restrictions
- Orders with unclear details
- Labor intense polished, anodized or premium

### Others:

- Complicated painted jobs
- 3D proofs (sculpted)
- Orders with any art modification
- All Fabricated, Plaques & Giclee (hi resolution printing)

## When does Gemini require a deposit on large orders?

A deposit may be considered on any order over \$1,500 upon review of order history, payment history and our overall experience together. Should a deposit be needed a representative from Account Services will personally connect with your Account Payable to discuss a payment arrangement. A 50% deposit is typically requested, while extremely large projects or special situations are often deserving of a customized plan to move the project along. As large order history develops and with promising payment history, deposits often become a thing of the past. Please reach out to our Account Services team with specific deposit questions at 877-702-5559 or [credit@gemini-signproducts.com](mailto:credit@gemini-signproducts.com).

## How long does it take to produce my order?

Lead times can vary based on product and finish. Each order acknowledgement provides a projected delivery date. When ordering plaques and custom letters / logos where an approval is needed refer to our [Jump Start Your Order](#) found on page 224.

## Do Gemini's plaques meet ADA specifications?

Yes - All Gemini ADA plaques have raised characters 1/32" from sign face. The Grade 2 braille will also be raised 1/32", with perfectly round tops and separated 3/8" from corresponding text. Plaque design should allow for adequately contrasting foreground and background for compliant visibility per ADA regulations. All ADA plaques are coated standard with matte clear coat for maximum durability. The typestyle on standard signs is usually Helvetica. Alternate type styles may be specified on custom ADA signs, but restrictions on styles do apply in meeting ADA specifications. The symbols depicted on Gemini's ADA signs meet Department of Transportation standards.

All raised lettering, symbols and borders on standard ADA signs receive a brushed finish. The raised Grade 2 Braille is painted to match the background. Raised areas may be painted with a color that contrasts with the background color upon request.

Borders on standard ADA signs are 1/8" wide raised single lines with radius corners. Other borders styles and corners are available on custom ADA signs.

If they are not already, offices, medical facilities, schools, and government buildings are becoming ADA compliant. As more and more businesses and buildings comply with ADA policies, you will find that ADA-compliant signs must be installed in the proper location and conform to local regulations that often dictate interior sign requirements, such as maximum occupancy signs and evacuation maps.

# Guaranteed Ground Freight

## How to calculate freight and all additional charges.

Your order for Gemini products may be split across multiple Gemini production locations due to geographical location, product type and capacity. Therefore, there will be instances where you will incur multiple freight charges per order based on the one-rate freight charge including freight, handling, COD and convenience fees. Please ask a customer service representative if you have any questions. Find the table that corresponds to your payment and freight method. Unless you are subject to a local tax—this is the total amount that will be added to your bill to deliver Gemini products to your door. Sales tax may apply when shipping to the following U.S. states: CA, MN, IA, NV, TX, VA & WA.

Gemini only has UPS scheduled pick-up. We will add a minimum \$8.00 per order pickup charge for other specified carriers. In addition, because these pick-ups must be called in the day prior to shipment; an additional day will be added to all estimated delivery dates for other specified common carriers. If you decide not to use Gemini's Guaranteed Ground Freight, Gemini charges a \$8.00 handling fee per order. Once your UPS account number is entered into our system, it will be used for all UPS shipments.

# Guaranteed Ground Freight

## Lower Your Guaranteed Ground Freight Costs

Fill out a credit application with Gemini

Gemini has a long history of working with sign professionals to provide them with high quality products at the lowest possible price. This includes working with them to eliminate unnecessary transaction fees by credit card and freight companies that are outside of Gemini's control. We prefer offering credit to our customers rather than building costs into the price of our products that covers these hidden charges. Another advantage of net terms allows Partners the ability to view invoice balances and pay online via GeminiSignProducts.com > Partner Portal. Click Payment Portal to experience the convenience of this payment option today.

Email [credit@GeminiSignProducts.com](mailto:credit@GeminiSignProducts.com) to request a credit application today or with any Payment Portal questions.

### Pay by Credit Card: VISA/DISCOVER/MC

Over \$5,000.00	\$60.00

## Expedited Freight

Expedited freight is also available but is billed at normal published rates from the point of origin of the Gemini manufacturing location to your delivery destination. Freight estimates are available by contacting Gemini's customer service at 1-800-LETTERS (538-8377).

## Oversize Freight

Several items in the catalog are noted to be oversized. These items may incur oversize surcharges when shipped via UPS or via truck. Special truck freight requirements, such as lift gates, may also incur additional freight surcharges above the guaranteed ground freight rates.

**Compare costs. Imagine the possibilities.**

This table provides a relative cost comparison between different letter product types and materials, but is just a starting point for what we can create with our custom, made-to-order capabilities! See back of sheet for more options.

# True Partnership.

## Our samples help you win more projects

Nothing convinces your customers like a product they can hold in their hands. To give you the tools you need to win, Gemini stands behind you with free samples of many of our most-requested letter, logo and plaque products. And if you want a custom prototype product made to your exact design specifications, we can do that too – at a vastly reduced cost.

**For over 50 years, our policy has been simple: get samples in our resellers hands quickly so we can win more projects together.**

### Gemini Sign Idea Starter Kit

Includes a selection of Gemini Letters, Logos and Plaque samples, plus our current catalog to help you price products options easily and quickly, and many tools to inspire your customers.

**Available at no charge.**

### Or request free, individual samples of:

- Cut, Cast and Fabricated Metal Letters and Logos
- Cut, Formed and Injection Molded Plastic Letters and Logos
- Laminated Display Letters
- Cast or Machined Plaque Samples
- Material Samples, Metal Finish Samples and Paint Chips

Product sample requests are handled within 24-48 hours and shipped by ground service carrier. Expedited shipping (1-2 days) is available with your FedEx or UPS account number.

The Gemini Partner Portal & Product Sample Program offers these comprehensive benefits to our partners.

ALL GEMINI PRODUCTS ARE BUILT TO LAST AND GUARANTEED FOR LIFE

# jumpstart YOUR ORDER OR QUOTE

The important information we need to get your project started right and fast.

1

## VECTOR PDF WITH SIZES

Indicate all dimensions within the artwork file. Example:

*"3/8" flat cut aluminum, painted 4310 and 2756, stud mount with template"*

Measuring letter heights:

**NORTH**

### All Caps

Indicate height of flat capital letter

**north**

### Lower Case

Indicate height of tallest letter

**NORTH**

### Mixed

Indicate heights of each size

2

## CHOOSE

- A) Product / Material
- B) Color / Finish
- C) Mounting Style / Template
- D) Specify your request (**order or quote**)

3

## SEND

Email your artwork file and specifications to:

Sales@GeminiSignProducts.com

*Made True.*

MADE BY  
 GEMINI

## Sending Digital Files

Quality vector art is preferred upon placing any request. Art fees may apply if additional design work is required.

### Guidelines:

#### Plastic and Metal Letters

- Block style flat cut letters require a minimum stroke of .125" for plain cut and .3" for stud mount.
- Block style formed plastic and cast metal letters will require a stroke of .5".
- Serifs on formed plastic and cast metal can not be less than .25".

#### Precision Tooled Plaques

- For most fonts, raised Capital letters should be .375" (approximately 40pt) high. Some fonts, however, can go as low as .25" (approximately 27pt) high, such as: Arial, Cambria, Georgia, Helvetica, Myriad, and Optima.
- Recessed letter sizes are dependent on the stroke width of the letter. Bold fonts are best suited for this task. All parts of the letter, including serifs if applicable, should be at least .03" thick.
- Kerning should allow for .03" of space between letters.
- Recessed areas in logos, seals or other line art should also be at least .03" wide.
- Condensing, thickening, or otherwise distorting the font may alter the required size.

#### Cast Plaques

- Raised letters:
  - Serif fonts such as Times New Roman, Garamond, or Goudy can be produced at .25" (approximately 27pt) high.
  - San serif fonts such as Helvetica, Arial or Myriad can be produced at .2" (approximately 21pt) high.
- Recessed letters and any recessed detail inside logos, seals, or other line art requires a minimum stroke width of .0625".
- Kerning should allow for .03" of space between letters.
- Condensing, thickening, or otherwise distorting the font may alter the required size.

#### Etched Plaques

- Recessed stroke limit for etching is .007" or .5pt. Raised strokes should be no thinner than .03" or 2.5pt.
- Recessed letters, in most cases, can be produced as small as .125" (approximately 13pt).
- Raised copy requirements vary depending on font. The minimum stroke width is .03" for all parts of the letter including serifs.

#### Accepted File Formats

- **Vector Graphics** should be saved as PDF, AI, or EPS. Artwork rendered in CorelDraw, Composer, or FlexiSign need to be exported as vector PDF files. Architectural drawings rendered in CAD may require reworking since they are generally not compatible with art programs.
- **Photos** should be saved as either PSD, TIF, JPG or PNG. Any supplied image should look crisp, clear and be free of pixelization on your screen when enlarged to the desired size on the final product.

#### TIPS FOR SENDING ARTWORK

1. Convert all fonts to "outlines" or "curves."
2. Provide all photo files separately without edits or cropping. Gemini will perform all required photo edits.
3. If adding braille to a plaque, please let us know what needs to be translated.
4. Provide us with specification details in either the email or artwork file.
5. Large files can be uploaded through our website [www.geminisignproducts.com](http://www.geminisignproducts.com) by logging into the Partner Portal and clicking "upload" artwork.
6. Avoid using gradients or transparency effects.
